Augmenting society's collective IQs
Directions for hypertext research: exploring the design space for interactive scholarly communication
Extending the role of the digital library: computer support for creating articles
Head-tail display: a lightweight approach to query-dependent document display
Towards digital libraries of virtual hyperbooks
Twin media: hypertext structure under pressure
The mystery of "lust"
Lust, touch, metadata: meaning and the limits of adaptation
Automatic categorization of Web sites based on source types
Language-theoretic classification of hypermedia paths
Structural analysis for Web documentation using the non-well-founded set
Properties of academic paper references
A linking and interaction evaluation test set for SMIL
FaceSpace: endo- and exo-spatial hypermedia in the transparent video facetop
Display-agnostic hypermedia
The site browser: catalyzing improvements in hypertext organization
Negotiating access within Wiki: a system to construct and maintain a taxonomy of access rules
WebDAV-based hypertext annotation and trail system
Following your colleagues' footprints: navigation support with trails in shared directories
Collaborative intensional hypertext
WICKEd: a tool for writing in the context of knowledge
A format design case study: PDF
Integrating the Web and the world: contextual trails on the move
Domestic hypermedia: mixed media in the home
Navigational hypertext models for physical hypermedia environments
Interaction alternatives for linking everyday presentations
An anatomy of anchors
How much is too much in a hypertext link: investigating context and preview - a formative evaluation
What hypertext is
The end-point is not enough
Saving private hypertext: requirements and pragmatic dimensions for preservation
Manipulating history in generative hypermedia
Experiences migrating microcosm learning materials
Practical aptitudes: case studies of applications of the ZigZag hypermedia system
A comparison of hyperstructures: Zzstructures, mSpaces, and polyarchies
Adaptivity in hyperfiction
Dynamically growing hypertext collections
A genetic algorithm approach to interactive narrative generation p. 181
Augmenting SCORM manifests with adaptive links p. 183
The Molhado hypertext versioning system p. 185
Hypertext versioning for embedded link models p. 195
Automatic generation of hypertext system repositories a model driven approach p. 205
Towards 'cinematic' hypertext p. 215
Integrating information seeking and structuring : exploring the role of spatial hypertext in a digital library p. 225
WARP : a Web-based dynamic spatial hypertext p. 235
Managing conflict in multi-model adaptive hypertext p. 237
Rethinking structural computing infrastructures p. 239
Towards a structural diversity space p. 247
Unifying structure, behavior, and data with themis types and templates p. 256
When open hypermedia meets peer-to-peer computing p. 266
HyperPeer : searching for resemblance in a P2P network p. 268
We the media : technology empowers a new grassroots journalism p. 270
