High-velocity clouds and the local group
H[alpha] distances to high velocity clouds
An H I census of loose groups of galaxies
Intergalactic HI clouds
HI tidal tails, bridges and clouds
Studies of an intergalactic HI cloud
HIPASS J0731-69 : tidal debris, or primordial gas cloud?
HI observations of nearby dwarf galaxies
The nature of high HI mass-to-light ratio galaxies
The properties of radio selected galaxies in HIPASS/HIJASS and SDSS
Intracluster stellar population
Intracluster planetary nebulae in clusters and groups
The ghosts of galaxies : tidal debris in clusters
Galaxy threshing and the origin of intracluster stellar objects
Galaxy disruption caught in the act
Results from a diffuse intracluster light survey
The systematics of intracluster starlight
A CFH12K survey of red giant stars in the M81 group
Chemical and thermal history of the intracluster medium
XMM observations of abundances in the intracluster medium
Dust in the intergalactic medium of galaxy clusters
The dust impact on the intergalactic medium
The orientation of galaxies in nearby galaxy groups
Subclustering in cooling and non-cooling flow clusters
Evidence for gas accretion in galactic disks
The hydrogen clouds in the galactic halo
High velocity gas in the halos of spiral galaxies
Holes and high velocity H I in NGC 6946
Multifrequency study of the blue compact dwarf Haro 2
The FUSE survey of O VI in and near the Milky Way
XMM-Newton observations of nearby edge-on starburst galaxies
A model of gas recycling based on condensed H[subscript 2]
Molecular gas in the edge-on galaxy NGC 4013
Young stars in the outer disc of NGC 6822
Do halo red giant stars contribute to the high-velocity gas falling onto the Milky Way disk?
Rotating halos and heavy disks : the case of NGC 2915
Magnetic activity following re-accretion on to galaxies
Gas mixing, gas cycles and the chemical evolution of dwarf irregular galaxies
The ionization equilibrium of iron in H II regions
Flux ratio [Ne V] 14.3/24.3 as a test of collision strengths
CO-to-H[subscript 2] abundance ratio of the foreground gas of the Carina Nebula
Galactic metallicity distribution from open clusters
Chemical and dynamical evolution of IZw18
The iron abundance in blue compact galaxies
The near-IR luminosity-metallicity relationship for dwarf irregular galaxies
Fe II emission as a probe of iron abundance at low-z quasars
Investigation of the UV radiation process in NGC 2023
XMM-Newton observations of hot gas in low mass dwarf galaxies
An introverted starburst: gas and SSC formation in NGC 5253
Young star clusters: clues to galaxy formation and evolution
3D studies of recycling signatures within irregular galaxies
Model for infrared properties of extremely young galaxies
PAH features in infrared luminous galaxies: results from Michelle
From star formation to compact remnants: X-ray studies of spiral galaxies
A reference sample: ISM of the most isolated galaxies
The nature of UV-selected galaxies in the Chandra Deep Field South
Modelling the ISM and star formation in galaxy formation simulations
Cautionary remarks on using SPH to model the ISM in galaxies
Simulations on the collisional properties of gas in galaxies
The effect of cosmic-ray diffusion for Parker instability
Metal abundances and kinematics of Ly-[alpha] absorbers
The structure of high redshift galactic halos
Physical properties of DLAs: metallicity and neutral hydrogen column density
H{subscript 2}-bearing damped Lyman-[alpha] systems as tracers of cosmological chemical evolution
Chemical evolution in hierarchical clustering scenarios
Chemical abundances and hierarchical clustering
The metal absorption systems of the FDF QSO 0103-260
The first sample of sub-damped Ly[alpha] systems and their chemical properties
Molecules in damped Ly[alpha] systems: spatial distribution
Sizes of intervening C IV absorbers from high resolution spectroscopy of APM 0827+5255

Multiwavelength observations of galactic winds: near and far
Starbursts and extra-planar H[alpha] from SINGG
A galactic example of a massive chimney
Superwind galaxies at high redshift: the case of LAE J1044-0130
IR mergers/QSOs with galactic winds
Chandra X-ray observations of dwarf starburst galaxies
X-ray emission from expanding shells in NGC 3077
The M82 outflow: X-rays as a probe for neutral disk gas
High resolution observations of molecular gas in the outflow of M 82
Massive stellar clusters and superwind engines in the antennae
Mass spectrum of a starburst
SN heating efficiency of the ISM of starburst galaxies
Simulating metal distributions in the ICM
Cluster formation with chemical and energy feedback
Gas outflows in radio galaxies
Winds and outflows in starburst galaxies and AGN
Subaru spectroscopy of the giant Ly[alpha] nebula around 1243+036
Quasar winds as dust factories at high redshift
Warm winds in the Seyfert 1 galaxy NGC 5548
Synchrotron jet model for the 1989-1996 cycle of activity of NGC 4151
Flows and shocks in variable fluxes of Seyfert galaxies
Absorption components in the nucleus of NGC 3227
Outflowing components in the prototype narrow-line Seyfert 1 Galaxy Markarian 478

The enrichment of galaxies by quasar outflows
Spiral galaxy - ICM interactions in the Virgo cluster
Ram pressure stripping of spiral galaxies in clusters
Ram pressure effects on the magnetic field of NGC2442
Mass stripping in dwarf spheroidal galaxies and [omega] cen
Deep spectroscopy of the very extended ionized gas of NGC 4388
The evolution of tidal debris
Case studies of mass transfer and star formation in galaxy collisions
The galaxy's eating habits
The galaxy merger origin of hot gaseous halos of ellipticals
Recycling of ghost galaxies : the origin of giant HI ring around NGC 1533
Head-on collisions : how to bring large quantities of gas out of inner disks
Stars and gas in the large interacting galaxy NGC 6872
Interactions among active galaxies : an HI perspective
A Fourier analysis of the interacting pair of galaxies KPG 404 (NGC 5394/95)
A structural NIR analysis of the interacting pair of galaxies KPG 404 (NGC 5394-95)

A galaxy merging sequence traced by X-rays
HST observations of the Toomre sequence of merging galaxies
Triggering star formation by galaxy-galaxy interactions
Magnetic fields in strongly interacting galaxy systems
Efficiency of stripping mechanisms
HI and hot gas in the outskirts of the M81 group
Double nuclei and "TDGs" : colliding or activity of nucleus monster?
The chemical evolution of the intra-cluster medium
Some effects of galaxy collisions in a cluster ICM
Environmental effects on the kinematics of Virgo cluster galaxies
Jet-induced star formation
Star formation in Virgo intracluster space
Tidal remnants and intergalactic H II regions
Discovery of intergalactic H II regions
Molecular gas and star formation in the NGC 3077 tidal arm
Superwind and chain galaxy formation at high redshift
Study of HI and star formation sites in the magellanic bridge
The dynamical masses of tidal dwarf galaxies
Molecular gas in tidal dwarf galaxies : on-going galaxy formation
H[alpha] kinematics of tidal tails in interacting systems : projection effects and dark matter in TDGs
VLA HI and OVRO CO interferometry of a tidal dwarf galaxy
Kinematic properties of the TDG candidates of CG J1720-67.8
Stellar populations of a sample of tidal dwarf galaxies
Stellar associations in the tail of NGC 4038
Identifying old tidal dwarf galaxies in simulations and in the nearby universe
Are cluster dwarfs recycled galaxies?
Two formation paths for cluster dwarf galaxies?
A tidal dwarf galaxy in the Hercules cluster?
Tidal dwarf galaxy candidates in Hickson compact groups of galaxies
On the nature of dwarf galaxies in the interacting group HCG 31
