Discriminative closed fragment mining and perfect extensions in MoFa p. 3
Updating the probability vector using MRF technique for a univariate EDA p. 15
A connective stability analysis of complex system simulation and control via multiagent systems p. 26
Rewriting queries using views with value integrity constraints p. 38
Inference in credal networks using multilinear programming p. 50
A CPG-based CBR model to offer the best available medical therapy p. 62
A case-based approach to managing and retrieving geospatial imagery tasks p. 72
A computational model for simulation of human navigation behaviour p. 84
Dynamic symmetry breaking in constraint programming and linear programming hybrids: p. 96 still life as a case study
Stream-based learning through data selection in a road safety application p. 107
IPE and L2U: approximate algorithms for credal networks p. 118
PREVENT: an algorithm for mining inter-transactional patterns for the prediction of rare events p. 128
Predicting the relevance of Web search results: a collaborative filtering approach p. 137
A study of backtracking based informed algorithms p. 147
Dynamic update of experience for a case-based reasoning system p. 158
Qualitative modelling of kinematic robots for fault detection and diagnosis p. 168
Data-oriented belief revision: towards a unified theory of epistemic processing p. 179
Similarity measures based on imperfect domain theories p. 193
Collective retrieval by autonomous robots p. 199
Analogy by alignment: on structure mapping and similarity p. 205
SIADEX: a real world planning approach for forest fire fighting p. 211
Context-sensitive word selection for single-tap text entry p. 217
Comparing redundancy removal techniques for multi-document summarisation p. 223
Using morphology to analyse and control a multi-agent system, an example p. 229
Applying case-based teaching to object-oriented framework training p. 235
Diagnosing and repairing ontological mismatches p. 241
Dynamic Web service composition through symbolic agent negotiation p. 247
Component level reasoning about robot fault diagnosis p. 253
Application of concept grounding techniques to reduce dimensionality in sensory-motor spaces p. 259
