On agility of formal specification p. 1
Ontological queries supporting decision process in KaSeA system p. 17
The conceptual framework to user-oriented content management p. 30
A model of digital contents access control system using steganographic information hiding scheme p. 50
An application of semantic information retrieval system for international relations p. 62
Emergence of names and compositionality p. 80
Treating quantifiers in database semantics p. 100
Semantic associative search and space integration methods applied to semantic metrics for multiple medical fields p. 120
Time contexts in document-driven projects on the Web: from time-sensitive links towards an ontology of time p. 136
(actual symbol not reproducible) description logics with aggregation of user preference concepts p. 154
Towards an abstraction ontology p. 166
A causality computation retrieval method with context dependent dynamics and causal-route search functions p. 186
A method of automatic metadata extraction corresponding to the impression by sound of the words p. 206
Business process modeling p. 223
Logic and artificial intelligence for multi-agent systems p. 236
A visual and semantic image retrieval method based on similarity computing with query-context recognition p. 245
Information systems development in the age of multimedia Web systems p. 253
NATO C3 architectures and difficulties of application in national environment p. 261
Mining international academic conference programs on the Web p. 269
Towards automatic detection of potentially important international events/phenomena from news articles at mostly domestic news sites p. 277
ROC curves for the CART algorithm in STATISTICA data miner p. 285
Development of designed Q-R code p. 290
Process and logic approaches in the intelligent agents behavior p. 295
Human expert modelling using numerical linear algebra: a heavy industry case study p. 301
Computer aided support for content management development p. 306
Ontology based text annotation - OnTeA p. 311
An implementation method for semantic document search with dynamic relevance routing by hierarchical and causal relationships for psychiatry p. 316
