Software Engineering Best Practices
On the Challenges of Correctly Using Metamodels in Software Engineering p. 3
Software Engineering Practices: An Auditor's Perspective p. 36
Technology Neutral Business Process Design Using URDAD p. 52
Software Development and Related Methodologies
A Method of Software Structure Designing Based on Graph Planning p. 73
ASOP: An Agile Service-Oriented Process p. 83
Approaching OWL and MDA Through Knowledge Management System: Application to Project Memory
Methodology of Building and Using Ontology for Providing Content-Based Access to Scientific Information Resources p. 105
Cognitive Modeling on Software Design and Natural Language Representation
The Art of Programming or Programs as Art p. 119
A Remark on Natural Language Processing from the Biolinguistic Perspective p. 126
Establishing Research Criteria for Performed Gestures and Emotional Interaction in an Interactive Gestural Film Game: To Be or not To Be p. 166
Network Software Security
Formal Technique for Discovering Complex Attacks in Computer Systems p. 185
Automatic Enforcement of Security in Computer Networks p. 200
Software Security and Validation
New Verification of Reactive Requirement for Lyee Method p. 225
Model Checking Communicative Agent-Based Systems p. 239
Program Conversion and Related Software Validation
Constructing Higher-Level Transformation Languages Based on XML p. 269
Toward Solving Equations in Kleene Algebras p. 285
Analyzing Software Engineering Processes on Source Code Level p. 305
Automated Design Improvement by Example p. 315
Experience of XML-Based Source Code Representation with Parsing Actions p. 330
Intelligent Software Design and Maintenance
On Implementability of the Formal Specifications p. 355
An Introduction to the Quantitative, Rational and Scientific Process of Software Development (Part 1) p. 361
An Introduction to the Quantitative, Rational and Scientific Process of Software Development (Part 2) p. 372
Measurement Analysis and Fault Proneness Indication in Product Line Applications (PLA) p. 391
User Requirement Engineering and Development
Clayworks: Toward User-Oriented Software for Collaborative Modeling and Simulation p. 403
A Unique Trial of Developing Software for the Actual Application by an Engineer with Non-Software Background p. 416
Algorithm Library Based on Algorithmic CyberFilms  p. 427
A Novel Intuitive GUI Method for User-Friendly Operation  p. 448
Service Oriented Systems
Determinants of Service Reusability  p. 467
Development of a Maintenance Environment that Enabling Users to Revise Existing Web  p. 475
Applications
ROME: A Reference Ontology in Medicine  p. 485
A Collaborative Environment for User-Initiated Development of Web Applications  p. 494
