Preface

Collaborative Voxel-Based Surgical Virtual Environments p. 1

Eye Gaze Tracking for Endoscopic Camera Positioning: An Application of a Hardware/Software Interface Developed to Automate Aesop p. 4

Repeated Palpatory Training of Medical Students on the Virtual Haptic Back p. 8

Strategies to Reduce Patient Harm: Understanding the Role of Design and the Built Environment p. 14

A Non-Linear Mass-Spring Model for More Realistic and Efficient Simulation of Soft Tissues Surgery p. 23

Learning & Retention in Adaptive Serious Games p. 26

Direct Versus Indirect Laryngoscopic Visualization in Human Endotracheal Intubation: A Tool for Virtual Anesthesia Practice and Teleanesthesiology p. 31

Far Forward Feasibility: Testing a Cricothyroidotomy Simulator in Iraq p. 37

Evaluating the Clinical Utility of Stereoscopic Clinical Photography p. 42

Validating Advanced Robot-Assisted Laparoscopic Training Task in Virtual Reality p. 45

Efficient Soft Tissue Deformation Using Charged Particles p. 50

Steps Towards Open Standards for Medical Virtual Reality Systems p. 62

Simulation of Dynamic Ultrasound Based on CT Models for Medical Education p. 56

Patient Specific Physical Anatomy Models p. 68

Towards Developing an Immersive and Interactive Virtual Fairview Peri-Operative Environment p. 74

Towards Anatomical Modelling of Multiple Organs Interaction Using Real Time GPU Based Non-Linear Elasticity p. 77

Visualizing the Medical Modeling and Simulation Database: Trends in the Research Literature p. 83

Towards Open Standards for Medical Virtual Reality Systems p. 89

A Flexible, Conformal Ultrasound Array for Medical Imaging p. 95

Novel Virtual Lap-Band Simulator Could Promote Patient Safety p. 98

Medical Student Satisfaction Using a Virtual Patient System to Learn History-Taking and Communication Skills p. 101

A Simulator to Explore the Role of Haptic Feedback in Cataract Surgery Training p. 106

Training and Evaluation of Lumbar Punctures in a VR-Environment Using a 6DOF Haptic Device p. 112

A Prototype Haptic Feedback System for Lower-Limb Prostheses and Sensory Neuropathy p. 115

A Framework for Interactive Examination of Automatic Segmented Tumors in a Virtual Environment p. 120

Interactive Visuo-Haptic Surgical Planning Tool for Pelvic and Acetabular Fractures p. 123

Optimizing a Head-Tracker Stereo Display System to Guide Hepatic Tumor Ablation p. 126

Why Do You Drink? Virtual Reality as an Experiential Medium for the Assessment of Alcohol-Dependent Individuals p. 132

Low Cost Augmented Reality for Training of MRI-Guided Needle Biopsy of the Spine p. 138
The Instrumented Instrument: Characterization and Training of Manual Skill in Open Suturing p. 141

Ergonomic Usability Testing of Operating Room Devices p. 147

Towards an In Vivo Wireless Mobile Robot for Surgical Assistance p. 153

Design and Implementation of Rule-Based Medical Models: An In Silico Pathophysiological Trauma Model for Hypovolemic Shock p. 159

A Modular Simulation Framework for Colonoscopy Using a New Haptic Device p. 165

First Clinical Evaluation of the Navigated Controlled Drill at the Lateral Skull Base p. 171

In Vivo Pan/Tilt Endoscope with Integrated Light Source, Zoom and Auto-Focusing p. 174

On the Problem of Determination of Spring Stiffness Parameters for Spring-Mesh Models p. 180

Evaluation of the Simulation Robot for Mandibular Movements with the Patient-Specific 3-Dimensional Plaster Model and Mandibular Movement Data - Clinical Application of the Physical Simulation Robot - p. 183

MedX3D: Standards Enabled Desktop Medical 3D p. 189

Physics-Based Virtual Environment for Training Core Skills in Vascular Interventional Radiological Procedures p. 195

A Cooperatively-Controlled Image Guided Robot System for Skull Base Surgery p. 198

Virtual Gait Training for Children with Cerebral Palsy Using the Lokomat Gait Orthosis p. 204

Initial Implementation of Mixed Reality Simulation Targeting Teamwork and Patient Safety p. 216

CT Image Applications for Pre-Surgical Assessment and Surgical Pre-Planning in Pediatric Dentistry p. 222

Effects of Expertise, Practice and Contextual Interference on Adaptations to Visuo-Motor Misalignment p. 225

Haptic Rate for Surgical Manipulations with Fingers and Instruments p. 230

Robotic Telepresence for Collaborative Clinical Outreach p. 233

In Vivo Robotics for Natural Orifice Transgastric Peritoneoscopy p. 236

VR Robotic Surgery: Randomized Blinded Study of the dV-Trainer Robotic Simulator p. 242

The Biomechanics of Percutaneous Needle Insertion p. 245

MR Fluid Haptic System for Regional Anesthesia Training Simulation System p. 248

Soft-Tissue Characterization During Monopolar Electrocautery Procedures p. 254

Representing Fluid with Smoothed Particle Hydrodynamics in a Cranial Base Simulator p. 257

CUDA-Based Real Time Surgery Simulation p. 260

Objective Assessment of Telesurgical Robot Systems: Telerobotic FLS p. 263

An Efficient Dynamic Point Algorithm for Line-Based Collision Detection in Real Time Surgery Simulation Involving Haptics p. 266

Physics-Based Real Time Laparoscopic Electrosurgery Simulation p. 272

Towards a Virtual Basic Laparoscopic Skill Trainer (VBLaST) p. 275

Revealing the Conceptual Substrate of Biomedical Cognitive Models to the Wider Community p. 281
A Virtual Reality 3D Jigsaw for Teaching Anatomy  
Monitoring Simulated Maternal-Fetal Heart Rate Signals  
Open-Source Shared Case Library  
Integration of Virtual Reality and Conventional Skills Trainers: A Mixed Resource Model  
Simulation of Punch Biopsies: A Case Study  
Haptic Guided Laparoscopy Simulation Improves Learning Curve  
Realistic Soft Tissue Deformation Strategies for Real Time Surgery Simulation  
Changes in Three Dimensional Simulation Models of the Airway Which Are Due to Increases in Age or Body Mass Index  
Multi-Parallel Open Technology to Enable Collaborative Volume Visualization: How to Create Global Immersive Virtual Anatomy Classrooms  
Comparative Study of Haptic Training Versus Visual Training for Kinesthetic Navigation Tasks  
Towards THz Medical Imaging; Reflective Imaging of Animal Tissues  
The Distortion of Reality Perception in Schizophrenia Patients, as Measured in Virtual Reality  
SimTools - A New Paradigm in High Fidelity Simulation  
Virtual Patient Monitors for New User Familiarization  
Virtual Standardized Patients for Training Health Professionals on Alcohol Screening and Brief Intervention  
Virtual Endoscopy on a Portable Navigation System for ENT Surgery  
Model for Nerve Visualization in Preoperative Image Data Based on Intraoperatively Gained EMG Signals  
Evaluating Elicited Anxiety in a Simulated Environment
