Preface

Genetics

Cytogenic Abnormalities in Buccal Cells During Spinal Deformities in Children p. 3

Growth

Body Mass Index of Girls in Health Influences Menarche and Skeletal Maturation: A p. 9
Leptin-Sympathetic Nervous System Focus on the Trunk with Hypothalamic Asymmetric Dysfunction in the
Pathogenesis of Adolescent Idiopathic Scoliosis?

Volumetric Thoracic Growth in Children with Moderate and Severe Scoliosis Compared to p. 22
Subjects Without Spinal Deformity

Back Trunk Morphology in 3301 Children Aged 3-9 Years Old p. 29

The Role of the Intervertebral Disc in Correction of Scoliotic Curves. A Theoretical p. 33
Model of Idiopathic Scoliosis Pathogenesis

Ultrasound Femoral Anteversion (FAV) Relative to Tibial Torsion (TT) is Abnormal p. 37
After School Screening for Adolescent Idiopathic Scoliosis (AIS): Evaluation by Two
Methods

Risser Sign: The Value of the Lateral Spinal Radiograph to Assess the Excursion of the p. 44
Iliac Apophysis

Stature and Growth Compensation for Spinal Curvature p. 48

Clinical Detectable Tension in the Growing Body: New and Revisited Signs in Clinical p. 52
Examination in Children with Postural Problems and Spinal Deformities

Biomechanics, Surface Topography and Imaging

Quantification of Intervertebral Efforts During Walking: Comparison Between a p. 61
Healthy and a Scoliotic Subject

Measuring the Rib Hump in Scoliosis with ISIS2 p. 65

Thoracic Kyphosis Angle Measurements with ISIS2 p. 68

Sagittal Alignment Correction of the Thoracolumbar Junction in Idiopathic Scoliosis p. 72
by in Situ Bending Technique

A 3-D Skeleton Model & SEMG Approach for Integrated Neck and Low Back Pain Analysis Test

Batteries

Analysis of the Mechanisms of Idiopathic Scoliosis Progression Using Finite Element p. 85
Simulation

The Relationship Between Hip Flexion/Extension and the Sagittal Curves of the Spine p. 90

Constrained Intensity-Based Image Registration: Application to Aligning Human Back p. 96
Images

Ergonomically Designed Kneeling Chairs Are They Worth It?: Comparison of Sagittal p. 103
Lumbar Curvature in Two Different Seating Postures

Faulty Posture and Style of Life in Young Adults p. 107

Finite Element Modeling of Vertebral Body Stapling Applied for the Correction of p. 111
Idiopathic Scoliosis: Preliminary Results

Influence of Correction Objectives on the Optimal Scoliosis Instrumentation p. 116
Strategy: A Preliminary Study

Development of an Apparatus to Evaluate Adolescent Idiopathic Scoliosis by Dynamic p. 121
Surface Topography

Biomechanical Modelling of a Direct Vertebral Translation Instrumentation System: p. 128
Preliminary Results
SpineCor vs. Natural History - Explanation of the Results Obtained Using a Simple Biomechanical Model  p. 133

Comparison of the Kyphosis Angle Evaluated by Video Rasterstereography (VRS) with X-Ray Measurements  p. 137

Postural Changes in Patients with Scoliosis in Different Postural Positions Revealed by Surface Topography  p. 140

Quantification of Localized Vertebral Deformities Using a Sparse Wavelet-Based Shape Model  p. 144

Computer-Assisted Cobb Angle Measurement on Posteroanterior Radiographs  p. 151

New Method of Scoliosis Deformity Assessment: ISIS2 System  p. 157

A Novel Solution for Registration of Stereo Digital Torso Images of Scoliosis Patients  p. 161

Marker Placement for Movement Analysis in Scoliotic Patients: A Critical Analysis of Existing Systems  p. 166

Etiology

Leg-Arm Length Ratios Correlate with Severity of Apical Vertebral Rotation in Girls After School Screening for Adolescent Idiopathic Scoliosis (AIS): A Dynamic Pathomechanism in the Initiation of the Deformity?  p. 189

New Clinical Observations Connected with "Biomechanical Aetiology of so Called Idiopathic Scoliosis" (2006-2007)  p. 194

Etiologic Theories of Idiopathic Scoliosis: Autonomic Nervous System and the Leptin-Sympathetic Nervous System Concept for the Pathogenesis of Adolescent Idiopathic Scoliosis  p. 197

Etiologic Theories of Idiopathic Scoliosis. Somatic Nervous System and the NOTOM Escalator Concept as One Component in the Pathogenesis of Adolescent Idiopathic Scoliosis  p. 208

Screening and Prevention of Scoliosis

Carrying a Rucksack on Either Shoulder or the Back, Does It Matter? Load Induced Functional Scoliosis in "Normal" Young Subjects  p. 221

Ultrasound Femoral Anteversion (FAV) and Tibial Torsion (TT) After School Screening for Adolescent Idiopathic Scoliosis (AIS)  p. 225

Positional Relationship Between Leg Rotation and Lumbar Spine During Quiet Standing  p. 231

Aetiology of Idiopathic Scoliosis. What Have We Learned from School Screening?  p. 240

Suggestions for Improvement of School Screening for Idiopathic Scoliosis  p. 245

Can Future Back Pain in AIS Subjects Be Predicted During Adolescence from the Severity of the Deformity?  p. 249

A Machine Learning Approach to Assess Changes in Scoliosis  p. 254

Mathematical Modelling

The Posterior Skeletal Thorax: Rib-Vertebral Angle and Axial Vertebral Rotation Asymmetries in Adolescent Idiopathic Scoliosis  p. 263

Prediction of the T2-T12 Kyphosis in Adolescent Idiopathic Scoliosis Using a Multivariate Regression Model  p. 269

Intervertebral Disc Changes in an Animal Model Representing Altered Mechanics in Scoliosis  p. 273

Education
Knowledge About Idiopathic Scoliosis Among Students of Physiotherapy p. 281

Treatment of Scoliosis

Thoracoplasty in the Surgical Treatment of Adolescent Idiopathic Scoliosis p. 289

Preliminary Validation of Curve Progression Model for Brace Treatment p. 294

BRACE MAP, a Proposal for a New Classification of Braces p. 299

Clinical and Postural Behaviour of Scoliosis During Daily Brace Weaning Hours p. 303

Do Imbalance Situations Stimulate a Spinal Straightening Reflex in Patient with Adolescent Idiopathic Scoliosis? p. 307

Congenital Scoliosis - Presentation of Three Severe Cases Treated Conservatively p. 310

Conservative Scoliosis Treatment in Patients with Prader-Willi Syndrome p. 314

Abstracts

FBN3 Gene Polymorphisms in Adolescent Idiopathic Scoliosis Patients p. 321

Investigation on the Association Between Estrogen [Beta] Receptor Gene Polymorphisms and the Susceptibility of Adolescent Idiopathic Scoliosis p. 322

Vitamin D Receptor Gene Polymorphisms: No Association with Low Bone Mineral Density in Adolescent Idiopathic Scoliosis Girls p. 323

Expression and Significance of Sox9 in Chondrocyte Cells from Adolescent Idiopathic Scoliosis Patients p. 324

Promoter Polymorphism of Matrilin-1 Gene (MATN1) Is Associated with Susceptibility to Adolescent Idiopathic Scoliosis: A Case-Control Study p. 325

Left-Right Asymmetry Gene Expression Domains Are Reversed in Adolescent Idiopathic Scoliosis p. 326

SNPs Analysis of CHD7 Gene and Idiopathic Scoliosis (IS) in Chinese p. 327

Collagen I Alpha 2 Gene Polymorphism Association Study in Adolescent Idiopathic Scoliosis p. 328

A Genetic Model for Studying the Etiopathogenesis of Late-Onset Idiopathic Scoliosis p. 330

Physical Exercises and Adolescent Idiopathic Scoliosis: Results of a Comprehensive Systematic Review of the Literature p. 331

Identification of SRS 22r Domains Using Factor Analysis Methodology p. 332

The SRS Outcome Questionnaire Can Discriminate Between Patients with Spondylolisthesis and Normal Healthy Adolescents p. 334

The Use of a Decision Tree Increases Accuracy when Classifying Adolescent Idiopathic Scoliosis Using Lenke Classification p. 335

Are There Sub-Types in Lenke-I Curves? p. 336

Posterior Instrumented Scoliosis Correction in Thoracic Late Onset Idiopathic Scoliosis: Two Year Results p. 337

Can Surgical Reduction Correct Spino-Pelvic Alignment in LS-SI Developmental Spondylolisthesis? p. 338

The Relationship Between Pelvic Balance and a Dome-Shaped Sacrum in Developmental Spondylolisthesis p. 339

A Historical and Observational Study to Expose Some Etiopathogenetic Factors that May Be Relevant to Adolescent Idiopathic Scoliosis (ArS) in Some Patients p. 340
French-Canadian Validation of the Spinal Appearance Questionnaire (SAQ) in the Adolescent Patients at a Scoliosis Clinic and Its Clinical Application

An Energy-Based Mechanobiological Growth Model for Simulating Vertebral Progressive Deformities Under Multi-Direction Loads

US and European Risser Grading Systems: Which One Best Predict the Curve Acceleration Phase in Adolescent Idiopathic Scoliosis?

Decreased Lean Mass in Adolescent Idiopathic Scoliosis

The Relationship Between RANKL/OPG and the Decreased Bone Mass in Adolescent Idiopathic Scoliosis Patients

Association Between Growth Hormone Gene and Adolescent Idiopathic Scoliosis

Expression of Melatonin Receptor in Chondrocyte of Adolescent Idiopathic Scoliosis

mRNA Expressions of Type I Collagen, Osteocalcin and Osteoprotegerin in Iliac Cancellous Bone from Girls with Adolescent Idiopathic Scoliosis

Expression of Runx2 and Type X Collagen in Human Vertebral Growth Plate of Adolescent Idiopathic Scoliosis

Is Corticospinal Tract Organization Different in Idiopathic Scoliosis? 

Effects of in vivo Mechanical Loading on Extracellular Matrix Components of the Growth Plate

Transverse Plane Pelvic Rotation Following Rotationally Corrective Instrumentation of Adolescent Idiopathic Scoliosis Double Curves

A Multivariate Regression Model for Predicting the T2-T12 Kyphosis in Adolescent Idiopathic Scoliosis

Poor Bone Mechanical and Structural Properties in 528 AIS Patients - Using Non-Invasive Quantitative Ultrasound

The Effect on the Intervertebral Pressure Distribution in a Goat Spine upon Implementation of a Spring-Like Device

Stress Shielding Within the Scoliotic Spine: A Progressive Risk Factor?

Suspension Is Better than Side-Bending to Assess Spinal Flexibility in Adolescent Idiopathic Scoliosis

Classification of Scoliosis Deformity 3-D Spinal Shape by Cluster Analysis

Alteration of Mobility and Trunk Muscle Activation During Walking and Bending in AIS Patients with Posterior Fusion

Three-Dimensional MRI Analysis of the Skull Morphometry in Adolescent Idiopathic Scoliosis Girls: A Pilot Study

Enhancement of Low Intensity Pulsed Ultrasound on Spinal Fusion Augmented with Stem-Cell-Bioceramic Composite

A New System for Classifying Torso Deformities in Scoliosis Using Localized Shape Indices

A Novel Visualization Scheme for Monitoring and Tracking of Torso Deformities in Scoliosis

Analysis of Trunk External Asymmetry in Side-Bending

Sagittal Spino-Pelvic Alignment in Lumbosacral Spondylolisthesis

Cerebrospinal Fluid (CSF) Flow Dynamics at the Craniocervical Junction in Adolescent Idiopathic Scoliosis: Morphological and Functional Study with Phase Contrast Magnetic Resonance Imaging
Is There Any Regional Difference of Brain Tissue Densities Between Adolescent Idiopathic Scoliosis (AIS) Patients and Normal Controls: A Morphometric Study with High Resolution MR Brain Imaging

A Significant Number of Patients with AIS Exhibit Transverse Plane Pelvis Deformation

Reducing Radiation Exposure for Scoliosis

Abnormal Proliferative Response of Chondrocytes to Melatonin in Girls with Adolescent Idiopathic Scoliosis
