Series Editor's Introduction

Preface

Contributors

Basics
The Importance of Hypertension in the Geriatric Population
Age-Related Changes in the Cardiovascular System
Aging, Arterial Stiffness, and Systolic Hypertension
Pharmacological and Pharmacodynamic Alterations in the Elderly: Application to Cardiovascular Therapies

Epidemiology and Trials
Epidemiology of Hypertension in the Older Patient
Nonpharmacological Trials in the Older Hypertensive Patient
Clinical Trials of Hypertension in the Older Patient

Evaluation and Management
Blood Pressure Measurement in Older Patients With Hypertension
Clinical Evaluation of the Elderly Hypertensive
Hypertension in the Elderly: Endocrine Causes of Secondary Hypertension
Diagnosis and Management of Hypertensive Renal and Renovascular Disease in the Elderly
Heart Failure in the Older Hypertensive Patient
Ischemic Heart Disease in the Older Hypertensive Patient: Evaluation and Management

Cerebrovascular Disease in the Elderly Hypertensive
Pharmacological Management
Diuretics and β-Adrenergic Blockers in the Management of Hypertension in the Elderly

Assessment of the Role of ACE Inhibitors in the Elderly
Use of Angiotensin Receptor Blockers in the Elderly
Clinical Trials With Calcium Antagonists in Older Patients With Hypertension
β-Adrenoceptor Blockers for Management of Hypertension in the Elderly
Combination Drug Therapy in the Elderly

Special Populations
Attitudes Regarding Hypertension Among Older African-American Adults
Treatment of Hypertension in the Elderly Patient With Diabetes
Management of Hypertension in Older Patients With Arthritis

Adherence
The Clinician's Role in Improving Therapeutic Adherence and Blood Pressure Control in Older Hypertensive Patients
