Introduction to computer networking and hardware concepts p. 1
WebLan-designer: a Web-based tool to enhance teaching and learning wired and wireless LAN design p. 21
INetwork: an interactive learning tool for communication networks p. 39
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Teaching protocols through animation p. 86
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Ethereal: a tool for making the abstract protocol a concrete reality p. 101
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Teaching and learning Wi-Fi networking fundamentals using limited resources p. 135
Information security risk analysis: a pedagogic model based on a teaching hospital p. 179
A practical introduction to input and output ports p. 201
Effectively using a network simulation tool to enhance students’ understanding of computer networking concepts p. 62
Enhancing teaching and learning computer hardware fundamentals using PIC-based projects p. 229
Assistant tool for instructors teaching computer hardware with the PBL theory p. 249
A simulator for high-performance processors p. 267
A remotely accessible embedded systems laboratory p. 284
LOGIC-minimiser: a software tool to enhance teaching and learning minimization of Boolean expressions p. 303
A practical introduction to serial protocols p. 319
VMware as a practical learning tool p. 338
