Windowing time in digital libraries

Concept maps to support oral history search and use

Facilitating access to large digital oral history archives through informedia technologies

Review mining for music digital libraries: phase II
Looking for a picture: an analysis of everyday image information searching  p. 198
Image-based evaluation of video-acquired research skills  p. 200
Keyphrase extraction-based query expansion in digital libraries  p. 202
Categorizing Web search results into meaningful and stable categories using fast-feature techniques  p. 210
A comprehensive comparison study of document clustering for a biomedical digital library MEDLINE  p. 220
Metadata aggregation and "automated digital libraries": a retrospective on the NSDL experience  p. 230
Using resources across educational digital libraries  p. 240
Template-based authoring of educational artifacts  p. 242
EcoPod: a mobile tool for community based biodiversity collection building  p. 244
Factors motivating use of digital libraries  p. 254
Scaffolding the-infrastructure of the computational science digital library  p. 256
Dynamic generation of OAI servers  p. 258
FRBR: enriching and integrating digital libraries  p. 260
Learning from artifacts: metadata utilization analysis  p. 270
Looking back, looking forward: a metadata standard for LANL's aDORe repository  p. 272
Measuring inter-indexer consistency using a thesaurus  p. 274
Learning metadata from the evidence in an on-line citation matching scheme  p. 276
Using controlled query generation to evaluate blind relevance feedback algorithms  p. 286
Thesaurus based automatic keyphrase indexing  p. 296
An architecture for the aggregation and analysis of scholarly usage data  p. 298
An experimental framework for comparative digital library evaluation: the logging scheme  p. 308
Insights into collections gaps through examination of null result searches in DLESE  p. 310
The social life of books in the humane library  p. 312
Search engine driven author disambiguation  p. 314
Tagging of name records for genealogical data browsing  p. 316
Automatic feature thesaurus enrichment - extracting generic terms from digital gazetteer  p. 326
An assessment of access and use rights for licensed scholarly digital resources  p. 334
Information seeking in academic learning environments: an exploratory factor analytic approach to understanding design features  p. 335
A performance support systems approach to digital publishing in libraries  p. 336
Selecting books: a performance-based study  p. 337
User perceptions of a federated search system  p. 338
Automatic extraction of table metadata from digital documents  p. 339
A tool for teaching principles of image metadata generation  p. 341
Evaluating the national science digital library  p. 342
Multi-linguistic collaborative distance learning: from information translation to knowledge translation  p. 343
Metadata data dictionary for analog sound recordings p. 344
Feasibility of developing curriculum standards metadata p. 345
On-demand metadata extraction network (OMEN) p. 346
Managing intellectual property issues in a commons of geographic data p. 347
Scientific research groups, digital libraries, & education: metadata from nanoscale simulation code p. 348
Interface design for browsing faceted metadata p. 349
Developing a metadata schema for CSERD: a computational science digital library p. 350
Creating a multi disciplinary digital library in the 5S framework p. 351
An analysis of the bid behavior of the 2005 JCDL program committee p. 352
Supporting biological information work: research and education for digital resources and long-lived data p. 353
Finding a metaphor for collecting and disseminating distributed NSDL content and communications p. 354
A curated harvesting approach to establishing a multi-protocol online subject portal p. 355
Incorporating computational science activities in high school algebra p. 356
Adapting peer verification, validation and accreditation processes for digital libraries p. 357
Quantifying the accuracy of relational statements in Wikipedia: a methodology p. 358
The ingest and maintenance of electronic records: moving from theory to practice p. 359
Technical architecture overview: tools for acquisition, packaging and ingest of Web objects into multiple repositories p. 360
Browsing affordance designs for the human-centered computing education digital library p. 361
Indexing institutional data to promote library resource discovery p. 362
Keeping the context: an investigation in preserving collections of digital video p. 363
Cloudalicious: folksonomy over time p. 364
Apparatus and methods for production of printed aromatic and gustative information p. 365
Teaching box builder: customizing pedagogical contexts for use of digital library resources in classrooms p. 366
ClaimID: a system for personal identity management p. 367
Pathways core: a data model for cross-repository services p. 368
Pilot testing the DigiQual protocol: lessons learned p. 369
Using citations for ranking in digital libraries p. 370
LemiURL Web link analysis for digital libraries p. 371
Exploring content-actor paired network data using iterative query refinement with NetLens p. 372
A content-based video browsing system based on visual neighbor similarity p. 373
OpenArXiv = arXiv + RDBMS + Web services p. 374
Real-time collaboration through visual search and voice-over-IP p. 375
Demonstrating the use of a SenseCam in two domains p. 376
