

Prevalence of urinary incontinence	p. 1
Anatomy	p. 9
Epidemiology of urinary incontinence	p. 21
Physiotherapy for children with bladder and bowel disorders	p. 27
The ageing lower urinary tract	p. 33
Assessment and treatment of urinary incontinence in neurologically impaired patients	p. 41
Patient assessment	p. 57
Quality of life assessment and questionnaires	p. 67
Investigations for lower urinary tract dysfunction	p. 75
Urinalysis	p. 81
Historical perspective of pelvic floor muscle training	p. 83
Pelvic floor muscle exercise in the treatment of urinary incontinence	p. 89
Advanced manual therapy for the pelvic floor	p. 95
Pelvic floor stability and trunk muscle co-activation	p. 99
Biofeedback	p. 105
Ultrasound	p. 111
The use of exercise balls	p. 117
Therapeutic electrical stimulation	p. 121
Bladder training and behavioural training	p. 127
Voiding problems	p. 133
The importance of fluids	p. 139
Pregnancy, childbirth and urinary incontinence	p. 143
Childbirth and anal incontinence	p. 147
Incontinence and the menopause	p. 151
The athletic woman / women and exercise	p. 153
The male patient	p. 159
The occupational therapist's approach to the management of incontinence	p. 163
Catheter care	p. 167
Surgery for urinary incontinence	p. 171
Drugs acting on the lower urinary tract	p. 181
An anatomical overview	p. 185
Faecal incontinence	p. 199
Constipation	p. 213
Abdominal massage for constipation	p. 223
Laxatives	p. 227
Prevalence, definitions and aetiology of pelvic pain	p. 231
Assessment and treatment of pelvic pain	p. 241
Background to pelvic organ prolapse	p. 249
Evaluation of prolapse	p. 259
Treatment and prevention of prolapse	p. 263
Ethical principles in pelvic floor physiotherapy	p. 267

Research trials in incontinence	p. 273
Infection control issues	p. 276
UK government guidelines	p. 285
Fluid intake and bladder diary	p. 289
Urinary incontinence assessment form	p. 291
