Cryptosporidium: The Analytical Challenge
Molecular Epidemiology and Systematics of Cryptosporidium parvum
Molecular and Phenotypic Analysis of Cryptosporidium parvum Oocysts of Human and Animal Origin
Complying with the New Cryptosporidium Regulations
Cryptosporidiosis in Healthy Adult Volunteers
Trial of a Method for Continuous Monitoring of the Concentration of Cryptosporidium Oocysts in Treated Drinking Water for Regulatory Purposes
A Dielectrophoresis System for Rapid Analysis of Cryptosporidium parvum
A Review of Methods for Assessing the Infectivity of Cryptosporidium parvum Using In-vitro Cell Culture
Applications of MALDI-TOF Mass Spectrometry in the Analysis of Cryptosporidium
Some Observations on Factors which Affect Recovery Efficiency in Cryptosporidium Analysis
Development of a Novel Method for the Capture, Recovery and Analysis of Cryptosporidium Oocysts from High Water Samples
The Experience of the Leap Proficiency Scheme With Respect to Cryptosporidium Testing
An Evaluation of the Current Methods for the Detection and Enumeration of Cryptosporidium in Water
Automated Detection and Viability Assessment
Can We Believe Our Results?
