Synergy between nanometric alumina and organoclay in conventional fire retardant systems for ethylene-vinyl acetate
Strained Organophosphorus Comps
SiO2 FR for polyamide
Use of Organosilicone Composites As Flame Retardant Additives and Coatings for Polypropylene
Kaolin TPP for recycled PET
Complex Micro-analysis Assisted Design of Fire Retardant Nanocomposites: Contribution to the Nano-mechanism
Impact of Nano-Particle Shape on The Flammability of Nanocomposites
Thermal and combustion behaviour of polymer-carbon nanofibre composites
Combination of carbon nanotubes with fire retardants: the thermal and fire properties of polystyrene nanocomposites
Nano fire behaviour using cone
P FR Epoxy nanocomposites
Study of the Relationship Between Flammability and Melt Rheological Properties of Flame Retarded Poly(Butylene Terephthalate) Containing Nanoclays
FR Epoxy composites
Image Analysis of 2D Intumescent Char Sections to Estimate Porosity
Modelling of intumescent coating
Fire Retardancy and Fire Protection of Materials using Intumescent Coatings - A Versatile Solution?
Trends in textile FR
New Textile Flammability Regs
N + P FR on cellulose fabrics
Synergistic flame retardant copolymeric polyacrylonitrile fibres containing dispersed phyllosilicate clays and ammonium polyphosphate
Flame retardance of polyacrylonitriles covalently modified with phosphorus- and nitrogen-containing groups
FR Back-coated textiles
FR PP Textiles
Influence of fire retardants on toxic and environmental hazards from fires
Assessment of fire toxicity from polymer nanocomposites
