Sustainable Design of Machine Tools through Load-Dependent Interventions and Adapted Services p. 173
Modeling and Implementation of Digital Semantic Machining Models for 5-axis Machining Application p. 177
Compensation of Thermal Deformations at Machine Tools Using Adaptronic CRP-Structures p. 183
A Model for Adaptively Generating Assembly Instructions Using State-based Graphs p. 195
Evaluating Assembly Instruction Methods in Cell Production System by Physiological Parameters and Subjective Indices p. 199
Assembly Work Settings Enabling Proactivity - Information Requirements p. 203
Assembly Information System for Operational Support in Cell Production p. 209
Multimedia Based Assembly Supporting System for Cell Production p. 213
Development of a Computer Aided Procedure to Control Division of Labour Based Disassembly Systems p. 217
A New Method to Control Work-in-Process Inventory for High Manufacturing Productivity p. 221
An Evolutionary Algorithm for Vehicle Routing Problem with Real Life Constraints p. 225
Integrated Data Management in Factory Planning and Factory Operation. An Information Model and its Implementation p. 229
Future Challenges in Process/Resource Planning Due to Increasing (Product) Variants p. 235
Modernisation of Industrial Engineering: Enhanced Participation of Employees p. 241
Towards Optimal Worker Assistance: Investigating Cognitive Processes in Manual Assembly p. 245
Social Aspects of Plant Monitoring and Visualization p. 251
Cluster Manufacturing Management to Improve Equipment Efficiency and Productivity p. 255
Penalty Distribution Method for Scheduling Based Supply Chain Management p. 261
Social Contract Based Manufacturing Scheduling with Combinatorial Auction Mechanism p. 265
Agent-based Dynamic Process Planning and Scheduling in Flexible Manufacturing System p. 269
GA Based Reactive Scheduling for Aggregate Production Scheduling p. 275
Development of a Multi-Agent Model for Production Scheduling in Innovative Flexible Manufacturing System p. 279
A Real-time Scheduling Method Considering Human Operators in Autonomous Distributed Manufacturing Systems p. 283
Production Scheduling System with Dynamic Lot Size in Case of Considering Set-up Time p. 289
The Impact of Lot Splitting in a Single Machine Scheduling Problem with Earliness - Tardiness Penalties p. 293
Integration of Process Planning and Scheduling Using Multi-Agent Learning p. 297
Module Structured Production System p. 303
Lean Production System Design from the Perspective of the Viable System Model p. 309
Implementation Strategy for a Flexibility Oriented Production System
A Study of Design Factors for Information Supporting System in Cell Production
On Reconfigurable Robotic Working Cells - a Case Study Mikael Hedelind
Linking Modules for Reconfigurable Manufacturing Systems
Global Footprint Design
TSUNAMI Effect Prediction Methodology for Critical Resource Analysis
Factory-in-a-box - Demonstrating the Next Generation Manufacturing Provider
Planning the Use of High-Power Excimer Laser for Psoriasis Treatment
Optimization Strategies of Laser Hardening of Hypo-eutectoid Steel
Fabrication or Wire Saw with Patterned Hard Bumps by Electrical Discharge Machining with Powder Suspended in Working Oil
Creation of Cross-Section Changing Hole with a Hemisphere by Means of Electrical Discharge Machining
Study of Cutting Temperature in Cold-Air Milling of Ti6Al4V Alloy
Environmentally Friendly Machining of Aluminum Using Minimal Quantity Lubrication System
An evolutionary Strategy for Optimizing Multi-pass Turning Operation under Dry Machining Conditions
Proposal of Real-Time Balancing Mechanism Using Magnetic Fluid for Machine Tool Spindle
Prototyping of Autonomous CNC Machine Tool Based on Digital Copy Milling Concept
Intricate Shaped Manufacturing by 6-Axis Non-rotational Cutting with the Application of Ultrasonic Vibrations
Expanding the Possibilities of Position Error Compensation in CAM for PKM Milling Machines
Optimization of Toolpath Generation in Medical CAM for a Machine Tool for Orthopedic Surgery
Development of CAM System to Estimate Tool Wear of Ball-end-milling
Model Based Control of a Piezo-actuated Axis
Resister Control of Sectional Drive Rotogravure Printing Press
Incremental Sheet Forming with a Robot System for an Industrial Application
Multi-Technology Platform for Hybrid Metal Processing
Super-Resolution Imaging for Automatic Visual Inspection Systems
Instrumented Fixtures for On-line Correction of Welding Paths
Surface Roughness and Microstructure in Ultrasonically Assisted Turning of W-Fe-Ni Alloy
Finishing Complex Surfaces with Zonal Polishing Tools
Sub-wavelength Pitched Cubic Mosaic Multi-layer Precisely Pressed by Nano-features Mold for Multi-functional Optical Elements
Simulation of Workpiece Kinematics in Centreless Throughfeed Grinding
Development of an Electroplated Polishing Tape Applying Electrodeposited Nickel Foil Method
Development of Ultrafine-Crystalline cBN Abrasive Grains for Innovative Grinding Technology
System for Planning of Resources in IPS\textsuperscript{2}-Delivery
Product Diffusion in a Market with Network Externalities: An Approach from the Viewpoint of Value-creation among Consumers p. 473
Cost Evaluation Method for Service Design Based on Activity Based Costing p. 477
Definition of Design Operation for Service p. 481
Industrial Product-Service-Systems - Typology of Service Supply Chain for IPS\textsuperscript{2} Providing p. 485
A Method of Supporting Conflict-Solving for Service Design p. 489
Learning Networks: a Method for Integrated Product and Service Engineering - Experience from the IPSE Project p. 495
Multi-Agent Market Modeling Based on Analysis of Consumer Lifestyles p. 507
Strategic Servicification - A Quality Based Approach beyond Service-Engineering p. 511
From Product to Service Orientation in the Maritime Equipment Industry - a Case Study p. 515
Knowledge Generation as a Means to Improve Development Processes of Industrial Product-Service Systems p. 519
Modelling Approach for the Integrated Development of Industrial Product-Service Systems p. 525
Integrating Function Model and Activity Model for Design of Service p. 531
Remanufacturing of Products Used in Product Service System Offerings p. 537
Integrated Design of Industrial Product-Service Systems p. 543
Evaluation of Product-Service Systems during Early Design Phase p. 547
Index of Contributors p. 553
