From Monomodal to Multimodal: Affect Recognition Using Visual Modalities p. 161
Introduction p. 161
Organization of the Chapter p. 163
From Monomodal to Multimodal: Changes and Challenges p. 164
Background Research p. 164
Data Collection p. 168
Data Annotation p. 169
Synchrony/Asynchrony Between Modalities p. 171
Data Integration/Fusion p. 172
Information Complementarity/Redundancy p. 174
Information Content of Modalities p. 176
Monomodal Systems Recognizing Affective Face or Body Movement p. 177
Multimodal Systems Recognizing Affect from Face and Body Movement p. 179
Project 1: Multimodal Affect Analysis for Future Cars p. 179
Project 2: Emotion Analysis in Man-Machine Interaction Systems p. 182
Project 3: Multimodal Affect Recognition in Learning Environments p. 183
Project 4: FABO-Fusing Face and Body Gestures for Bimodal Emotion Recognition p. 184
Multimodal Affect Systems: The Future p. 185
