Conducting Polymer-based Carbon Nanotube Composites: Preparation and Applications  p. 1

Discovery of Conducting Polymers  p. 1
Synthesis of Conducting Polymers  p. 2
Conductivity and Doping of Conducting Polymers  p. 3
Conducting Polymers as Carbon Nanotube (CNT) Composite Matrices  p. 6
Applications of CNT/Conducting Polymer Composites  p. 9
Supercapacitors  p. 9
Rechargeable Lithium-ion Battery Electrodes  p. 12
Photovoltaic Devices  p. 14
Organic Light-emitting Diodes (OLEDs)  p. 16
Conclusions  p. 17
Acknowledgements  p. 17
References  p. 18
Actuators and Infrared Sensors Based on Carbon Nanotube-Polymer Composites  p. 22
Introduction  p. 22
Shape-Memory CNT-Polymer Composites  p. 23
IR Heating of CNT-SMP composites  p. 25
Inductive Heating of CNT-SMP composites  p. 28
Resistive Heating of CNT-SMP composites  p. 28
Shape-Changing CNT-Polymer Composites  p. 31
Light-driven Shape-changing CNT-Polymer Composites  p. 32
Electroactive Shape-changing CNT-Polymer Composites  p. 36
CNT-Polymer Composite IR Sensors  p. 42
Conclusions  p. 44
Acknowledgements  p. 45
References  p. 45
Photoelectrical Responses of Carbon Nanotube-Polymer Composites  p. 51
Introduction  p. 51
Band Structure and Chirality Dependence  p. 52
Band-to-band Transition of SWNTs  p. 53
Wrapping SWNTs with Polymers  p. 56
Energy Transfer from Photosensitive Polymers to SWNTs  p. 58
Photoelectric Responses from the SWNTs Coated with Photosensitive Polymers  p. 58
SWNT Optoelectronic Devices Based on Photosensitive Polymers  p. 59
Electrostatic Force Microscopy (EFM) Measurement of SWNT-Polymer  p. 63
The Ability for Hole and Electron Discrimination in SWNTs  p. 64
Conclusions  p. 69
References  p. 69
Chemical Functionalisation of Carbon Nanotubes for Polymer Reinforcement  p. 72
Introduction  p. 72
Non-covalent Functionalisation of CNTs  p. 73
