Development strategies, local transport networks and funding  p. 3
Cities, environment and development: an integrative societal approach toward a sustainable transport system  p. 15
A comparative analysis of energy usage and emissions of transport systems  p. 25
The impact of demand management on public transport use in relation to socio-economic characteristics  p. 37
Simplified public transport route planning method: a study case in Bandung (Indonesia)  p. 47
Traffic assignment in a GIS environment  p. 57
The effect of congestion pricing on metropolitan demands for fuel efficient vehicles  p. 67
The influence of road transport systems in the emissions of air pollutants. The case of the ring road of Barcelona city during the period of 1990-1993  p. 79
Some considerations of network traffic noise and a decision support system  p. 87
Urban transport and local air quality management in Great Britain  p. 97
Community facilities and the demand for travel  p. 107
A multicriteria environmental sensitivity evaluation of the urban road network: an Australian case study  p. 117
A neural network approach to evaluating urban policies: the case of Santiago, Chile  p. 127
Traffic management strategies to reduce air pollution  p. 141
Improving car adaptability to the environment according to exhaust gases toxicity  p. 149
An empirical study on urban transportation energy and residential location  p. 155
Optimization of choices in urban transport planning: a multicriterial model  p. 165
Environmental impacts of land and maritime transports in urban areas  p. 175
Sustainable development and urban public transportation systems planning with special reference to Istanbul  p. 185
Investigation of emission behaviour in an urban driving cycle with a remote sensing system  p. 199
The environmental impacts of traffic management schemes  p. 209
A flexible modelling and simulation system for environmental impact analysis in traffic planning  p. 221
Road accidents in Saudi Arabia: a comparative and analytical study  p. 231
Study of emissions of nitrogen oxides (NO$_x$) and volatile organic compounds (VOC) from urban traffic  p. 255
The environmental impact of ships traffic in and out of the Dubai Creek  p. 265
Organic toxic air pollution in Macau and other coastal cities of South China Sea  p. 273
Environment and perspectives of alternative fuels in urban transport in Brazil  p. 283
A review of the history of emission legislation, urban and national transport trends and their impact on transport emissions  p. 293
Ten societal trends and their potential impact on the movement of goods in European urban agglomerations  p. 305
An integrated car restriction and park-bus strategy for improving street space use  p. 315
Area speed-flow relationships and network aggregation  p. 325
