Preface

Structural Issues
Identification of structural pathologies of San Martin tower
Practical applications of the constructional principles for ancient pagoda
The stability of slender masonry mullions
New ideas on the use of systematically constructed tension structures to cover historical archaeological sites
Fire resistance of historic iron structures in multi-storey buildings

Seismic Behaviour and Vibrations
Seismic stabilization of heritage structures in California
Seismic rocking response of the columns of Agrigento temples
Earthquake risk analysis on historical buildings in Yistanbul
Stress analysis of an ancient stupa in Sri Lanka in connection with its conservation

Histride: an integrated software environment for dynamic structural identification

Post-earthquake renewal in the Soca Valley region, from the aspect of preservation of traditional buildings and from the economic point of view
Fundamental investigation concerning restoration of ruins of Machu Picchu: discussions on seismological aspects
The reform of story-increasing and anti-seismic strengthening of certain historical buildings
Analysis and investigation of seismic behavior for multi-story-pavilion ancient pagodas in China

Material Problems
Characterization of damage in a limestone
Triaxial testing of historic masonry, test set-up and first results
Effectiveness of polymer-based impregnation agents on natural stones--long-term studies

Maintenance
Experimental research to forecast the maintenance times for historic buildings damaged by urban pollution
A necessary restoration for the traditional and historical buildings in Volla plain (Naples, Italy)
Informatic tools for historical centres maintenance
The specification for a Web-based integrated document management system relating to building renovation
The restoration of ancient brickwork chimneys

Prevention of Structural Damage
Assessing 19th century 'fireproof' buildings
Two-layers jacketing for column drums
Proposal on movement of the church "Saint Cathoghikeh" in Yerevan City to prevent further deterioration from vibrations and to increase earthquake resistance

Dry rigid block masonry: safe solutions in presence of Coulomb friction

Stabilisation and Reinforcement
About the strengthening design of the masonry chimney of the former sugar house in Cesena (Italy) p. 265

Long-term review to the rehabilitation of the collegiate church in Konigslutter, Germany p. 275

Experimental Techniques
Creep failure of ancient masonry: experimental investigation and numerical modeling p. 285

Backfill role on the stability of arches and vaults p. 295
Dynamic and earthquake behavior of ancient columns or colonnades with or without shape memory alloy devices p. 305
Imaging structural elements of a cathedral using ground penetrating radar p. 315

Monitoring and Testing
Monitoring a masonry building of the 18th century by the acoustic emission technique p. 327

Sonic tomography of the stone pillars of a 17th century church p. 339
Application and limits of weathering simulation on the maintenance of monuments p. 349
Application of vibroacoustical methods for testing and condition monitoring of historical buildings in St.-Petersburg p. 363
Feedback control of masonry vault p. 371

Simulation and Modelling
Influence of strengthening techniques on the dynamic response of masonry structures p. 383
A study of the membrane state of Florence Cathedral dome p. 395
Interior thermal insulation systems in the renovation of historical buildings: a computational analysis p. 405
Mechanics of traditional connections with metal devices in timber roof structures p. 415

Statistical analysis of infilled frames p. 425
Methodology for the building estate knowledge: analytic tools for identifying degradation processes p. 435
Suitability tests of improvements to half-timbered walls by simulations p. 441
Investigation and recalculation on the "Hyparschale" in Magdeburg p. 451
"Virtual Project": the future for the representation and the restoration of historical-artistic buildings p. 461

Deterioration, Protection and Evaluation of Materials
Close range digital photogrammetry for the measurement of erosion to historic adobe structures p. 473
Tensile and low-cycle compressive tests on a natural structural stone p. 483
Investigation of the protective effect of repair mortars with migrating corrosion inhibitor in deterioration of structural damage p. 497
The quantification of the moisture distribution in renovated historical wall structures and exposed monuments p. 507
Injection methods for retrofitting of moisture damaged constructions p. 517
Rehabilitation of hydraulic masonry heritage structures: injection of special cement-based grouts and tomographic control p. 527
The role of the pointing mortar in the damage due to salt crystallisation p. 537
Classification of masonry structures used in domestic architecture of 17th-19th centuries in Madrid p. 549
Soluble and non water soluble sulphates in damage layers on hydraulic mortars p. 561
Influences affecting compressive strength of modern non-hydraulic lime mortars used in masonry conservation p. 571
Influence of different surface systems and humidity-controlled ventilation systems with heat recovery on the indoor climate in flats p. 581

Historical and Architectural Aspects
Documents in stone: at the interface of material history and conservation p. 593
Evolution of architectural forms of historical buildings p. 599
Some observations on the concept of construction p. 609
Degrees of physical adaptation: current uses of historic naval building types p. 617
Heritage structures are the benchmarks of our cultural evolution p. 633
Interdisciplinary approach for the restoration of the Church "La Madonna della Pieta" p. 645

Reconstructing ancient buildings by generating systems p. 661
Historical pointing and the preservation of its value p. 671
Influence of geometrical and material properties on multiple-leaf walls behaviour p. 681

Protection of cultural heritage in a modern city: the case of Belo Horizonte--Brazil p. 693

Rehabilitating historic buildings: an European Action project p. 707

Index of Authors p. 717
