Keynote address: Interdisciplinary approach for brownfields

Case studies

Case history of a "brownfields" site in Wichita, Kansas USA: innovative approaches to groundwater remediation

Monitoring the effectiveness of remediation: A case study from Homebush Bay, Sydney, Australia

Redevelopment potential of landfills. A case study of six New Jersey projects

City of Hopwell, Virginia--learning to deal with its industrial legacy

Successful redevelopment and risk management in Emeryville, California

Redevelopment of the former Shell Haven refinery

Remediation and redevelopment of the former highway maintenance yard, Grande Prairie, Alberta, Canada

Process of integrating screening and detailed risk-based modeling analyses to ensure consistent and scientifically defensible results

The contribution of the reuse of historic naval and airforce sites to brownfields regeneration: filling in the 'white holes'

Unusual aspects of Arsenic distribution, in the area of the industrial distric of Scarlino (Tuscany): problems connected with sulfuric acid production from pyrite

Community and public involvement

Eco-industrial redevelopment of LA brownfields

Strategic communications can enhance brownfields public participation

Involving stakeholders to achieve successful development of brownfield sites

The brownfields cookbook: a redevelopment guide

White book of urban Spanish brownfields

Environmental assessment

Public health role in redevelopment efforts

Environmental balancing of brownfield redevelopment

Brownfields contribution in managing urban sprawling and soil consumption in Brescia

Cost-effectiveness in polluted site sampling campaign

Development issues

Brownfields development issues

Integrated concept for groundwater remediation INCORE

Smart growth and prosperity

The city of Muskegon Heights, Michigan

Financial and insurance aspects

Value creation in the redevelopment of environmentally impaired properties

Economic aspects of polluted soil bioremediation

Risk management

Sustainable management of groundwater resources with regard to contaminated land. RTD needs

Identification of subsurface environmental barriers and brownfield development

Proper risk management: The key to successful brownfield development
Fixed price cleanups as useful tools to eliminate risks in brownfields redevelopment p. 307

Multimedia modelling and assessment
Integrated decision making for brownfields properties p. 317
Multimedia-modeling integration development environment p. 327
Database integration in a multimedia-modeling environment p. 337
An overview of USEPA's integrated multi-media, multi-pathway and multi-receptor exposure and risk assessment tool--The 3MRA Model p. 343
Army risk assessment modeling system for evaluating health impacts associated with exposure to chemicals p. 353
A flexible object-oriented software framework for developing complex multimedia simulations p. 363
Fugacity framework: web access and implementation for site assessment and rehabilitation p. 373
Concepts associated with a unified life cycle analysis p. 385
Lessons from the field
Public policies that foster contaminated land recycling--expanding the horizon p. 397
More alike than different: local collaboration on brownfields issues in border communities p. 407
Somerset County, New Jersey's center-based brownfields pilot p. 419
Improving the brownfield's timeline for redevelopment p. 425
Cleanup methodologies
Surfactant-enhanced desorption for recalcitrant hydrocarbons contaminated soils p. 439
Recovery of coal tar in 1-D column test using surfactant enhanced aquifer remediation (SEAR) p. 449
Selection of alternative sorbent media for contaminated groundwater clean-up p. 457
In-situ chemical oxidation of a chlorinated groundwater plume at a brownfields site p. 467
Enhanced in situ bioremediation of chlorinated solvents p. 477
Integrated remediation of brownfield sites using batch and continuous thermal desorption combined with physiochemical processes p. 485
The coupled effect of electrokinetic and ultrasonic remediation of contaminated soil p. 495
Accelerating pollutant release from mud bed by sand drains p. 507
Modeling transport and biodegradation of PCE in sandy soil p. 515
The i-BO process and related treatments for mine waste remediation p. 525
Biological degradation of PCBs in soil. A kinetic study p. 533
Understanding the outcomes of brownfield clean-up programs p. 539
Index of Authors p. 549
