Overview
The conventional vision
The conventional starting point: energy and GDP
Sector demand
Projections
Regional differences
Fuel mix
Sector use: the electricity conveyor
New market structures for electricity
The conventional vision for electricity
Other sectors
Energy prices: difficult theory, poor data
Oil prices: no longer in the lead
Prices and market shares
Gas and coal prices
Conclusions: the conventional vision and its problems
Oil supply
Introduction: the future of oil supply
The reserves debate: half full or half empty?
Underlying issues and uncertainties
Unconventional oil
Policy matters
Conclusions
Transport in transition
Demand for transport fuel
Transport demand
Clean air and GHG emissions
New policy compromises
Technological development
Policies to promote modal change
Developing countries: the case of Korea
Air transport
Preparing for change
Gas for oil markets
Introduction
Resources and reserves  p. 88
Natural gas demand to 2020  p. 91
Natural gas prices  p. 96
Market overview by region  p. 99
Country examples  p. 108
Critical questions for gas and oil markets  p. 114
Conclusions  p. 122
Oil prices: the elastic band  p. 131
The oil price epic  p. 132
Market structure changes  p. 142
Theory  p. 146
Institutional context  p. 158
Prices in the 'new economy of oil'  p. 166
Energy security  p. 176
Oil now and in 1973  p. 178
The changing role of governments in the global economy  p. 181
The geopolitical context  p. 183
Objectives of energy security  p. 197
Managing energy security risks  p. 202
Summary  p. 207
Acceptability: stretching the limits  p. 209
Acceptability begins at home  p. 210
The world pushing at the door  p. 216
The social acceptability of oil  p. 239
Challenges and choices  p. 252
Questions of availability  p. 253
New questions of acceptability  p. 260
Strategies and risks  p. 270
Conclusion  p. 276
Index  p. 279
