Biomaterials for Tissue Engineering
Design of Synthetic Polymeric Structures for Cell Transplantation and Tissue Engineering
Biomaterials for Hard Tissue Applications
Histological Patterns of the Tissue Reaction to Polymers in Orthopaedic Surgery
Poly(HEMA)-Collagen Composite as a Biomaterial for Hard Tissue Replacement
In-vivo and Clinical Evaluations of Poly (L-lactide) Plates and Screws for Use in Maxillofacial Traumatology
The Development of a Novel Implant: Induction of a Non-rigid and Self-Renewing Anchorage of Artificial Implants to Bone
Ultra-high Strength, Self-Reinforced Absorbable Polymeric Composites for Applications in Different Disciplines of Surgery
Biomaterials for Soft Tissue, Blood and Cardiovascular Applications
A New Gas Discharge Process for Preparation of Non-Fouling Surfaces on Biomaterials
The Influence of Chemical Functional Groups on Implant Biocompatibility
An Improved Method of Endothelial Seeding on Small Caliber Prosthetic Vascular Grafts Coated with Natural Extracellular Matrix
Tetrahydrofuran (co)polymers as Potential Materials for Vascular Prostheses
In-vitro and In-vivo Models for the Study of the Relationship between Hydrophilicity and Calcification of Polymeric and Collagenous Biomaterials
Analysis of Biomedical Polymer Surfaces: Polyurethanes and Plasma-Deposited Thin Films
Plasma Protein Adsorption on Model Biomaterial Surfaces
Safety and Intracardiac Function of a Silicone-Polyurethane Elastomer Designed for Vascular Use
The Role of Cellular Fibronectin in the Interaction of Human Endothelial Cells with Polymers
Biomaterials for Drug Delivery Systems
A Morphine-Triggered Delivery System Useful in the Treatment of Heroin Addiction
Indomethacin-Loaded Poly (D,L-lactide) Nanocapsules: Protection from Gastrointestinal Ulcerations and Anti-inflammatory Activity Evaluation in Rats
The Influence of Coatings with Surfactants on the Body Distribution of Nanoparticles after Intravenous Injection to Rats
Glucose-Sensitive Polymeric Matrices for Controlled Drug Delivery
In-vitro Degradation of Polyesteramides Containing Poly-[epsilon]-caprolactone Blocks
The Efficacy of Controlled Antibiotic Release for Prevention of Polyethyleneeterephthalate- (Dacron-) Related Infection in Cardiovascular Surgery
Ultrasound for Controlled Delivery of Therapeutics
Ocular and Brain Biocompatibility of Polymeric Delivery Materials Prepared from Ester Derivatives of Hyaluronic Acid
Calendar of Events
