Seals
C623/057/2004 Calibration of labyrinth seal bulk flow design analysis predictions to CFD simulation results p. 3
C623/018/2004 Rotordynamics of turbine labyrinth seals--a comparison of CFD models to experiments p. 13
C623/049/2004 Assessing seal clearance loss caused by static deflection and unbalance response of a large compressor rotor p. 23

Bearings
C623/014/2004 Stabilization of a rigid rotor by a time-varying stiffness of the bearing mounts p. 45
C623/015/2004 Squeeze film damper with rigorous account of cavitation p. 55

Analysis
C623/010/2004 Dynamic analysis of a rotor system supported by non-ideal plain journal bearings p. 69
C623/021/2004 The stability of centrifugal compressors by applications of tilt-pad seals p. 81
C623/038/2004 Rotordynamic modelling of a multi-stage water-injection pump for enhanced oil recovery p. 91
C623/019/2004 A tracking solver using sliding mode control to obtain eigensolutions of rotor-bearing systems p. 111
C623/068/2004 Investigation into the performance of an aero-engine rotor assembly incorporating a non-circular squeeze film damper p. 121
C623/070/2004 Analysis of a flexible rotor system including non-linear squeeze film damping using a finite element method p. 131
C623/024/2004 Numerical approach to investigation of stability and vibration of rotors supported by long segment bearings lubricated with oil containing air bubbles p. 153
C623/028/2004 Analysis of essentially non-linear vibration of large-scale models for bladed discs with variable contact and friction at root joints p. 163
C623/008/2004 Computational modelling of frequency-dependent additional effects during fluid-film interaction with structures p. 173
C623/075/2004 The stiffening effect of laminated rotor cores on flexible-rotor electrical machines p. 193

Experimental
C623/023/2004 Validating synchronous blade vibration amplitudes from blade tip-timing data analysis p. 205
C623/110/2004 Laser doppler vibrometry measurements of a rotating milling machine spindle p. 231
C623/040/2004 Model-based analysis of torsional and transverse vibrations of geared rotating machines
C623/078/2004 Real-time travelling waves and whirl decomposition
C623/033/2004 A simple but versatile rotor model
C623/039/2004 Defeating Nyquist
C623/007/2004 Application of Goertzel Algorithm for unbalance signal processing
C623/020/2004 Rolling element bearing fault detection using improved envelope analysis
C623/027/2004 Automated novelty detection using a modified Kohonen self organizing map
C623/059/2004 Damaged roller bearing vibrations--study of the cyclic statistical features
C623/101/2004 The effects of localized gear tooth damage on the gear dynamics--a comparison of the effect of a gear tooth root crack and a spall on the gear transmission error

C623/046/2004 An application of artificial neural networks and fuzzy logic to vibration monitoring of large rotating machinery in power plants
C623/026/2004 Automatic feature extraction for bearing fault detection using genetic programming
C623/030/2004 Identification of rotor dynamic machinery--a laboratory trial
C623/081/2004 Unbalance identification in a large steam turbogenerator using model-based identification and modal foundation
C623/105/2004 Experimental estimation of bearing dynamic parameters from rundown data
C624/072/2004 Identification of the configuration state of turbomachinery using rotor deformation measurements
C623/093/2004 Evaluation of rigid and flexible coupling models in an experimental rotor-coupling-bearing system using frequency response functions
C623/034/2004 Vibration measurements for validation of electromechanical rotor model for cage induction motor
C623/091/2004 Updating method based on genetic algorithm applied to non-linear journal bearing model

Case Studies
C623/011/2004 Vibration of an automotive turbocharger--a case study
C623/037/2004 Rotordynamic analysis of an electric submersible pump
C623/103/2004 Dynamics of high-speed cryo pump rotors

Diagnostics
C623/088/2004 Diagnosis of gearbox faults in the field
C623/060/2004 Detection and modelling of rotor eccentricity in electrical machines--an overview
C623/009/2004 Analysis of rolling element bearing faults in rotating machinery--experiments, modelling, fault detection, and diagnosis
C623/062/2004 Inverse determination of imbalance distributions
C623/077/2004 Active diagnostics of rotating structures

Cracked Rotors
C623/067/2004 Torsional behaviour of cracked rotors  p. 553
C623/025/2004 A scenario test for detection of breathing crack in rotors  p. 563

Modelling and Analysis
C623/051/2004 Model analysis of rotor system using modulated co-ordinates for asymmetric rotor system with anisotropic stator  p. 575
C623/047/2004 Integrating experimental tests and rotordynamics analysis for solving vibration problems on geothermal turbogenerator sets  p. 585

Modelling and Optimization
C623/069/2004 Application of a new modelling technique to a highly non-linear flexible rotor system  p. 605
C623/092/2004 Statistical analysis and optimization of design parameters in components of rotating machinery  p. 615
C623/063/2004 Simultaneous optimum design of rotor and magnetic bearings  p. 627

Rub-Related Vibration
C623/012/2004 Parametric characterization of rub induced whirl instability using an instrumented rotordynamics test rig  p. 651
C623/080/2004 Rotor-to-stator rub causing spiral vibrations--modelling and validation of experimental data on a real rotating machine  p. 671
C623/001/2004 Low-frequency vibrations in disk braking systems--controlling the creep-groan phenomenon in road vehicles  p. 681

Smart Machine Concepts
C623/036/2004 New system identification scheme of AMB rotor system considering sensor and actuator dynamics  p. 693
C623/017/2004 Active parametric vibration control of a smart beam  p. 703
C623/074/2004 Vibration control with lateral force produced in electrical machines  p. 713

Authors’ Index
p. 723
