Preface
Experimental Investigations of Dense Solid Hydrogen
X-Ray and Optical Research to 560 GPa: Metallization of Molecular Solids, Xe, S, O[subscript 2], and the Prospects for Metallic Hydrogen
Static and Dynamic Structure of Fluid Alkali Metals in the Metal-Nonmetal Transition Range
Electron-Ion Correlations and Elementary Processes in Dense Liquid Metallic Hydrogen
Ionization and Recombination Coefficients for a Strongly Coupled Hydrogen Plasma
A Semi-Classical Model for Ionization of Dense Hydrogen Plasmas
Microscopic Correlations and Phase Diagrams for Dense Multi-Ionic Plasmas
Crystallization of Dense Binary Ionic Mixtures. Application to White Dwarfs Cooling Theory
Electronic Structure and Enthalpy of Hydrogen and Helium Mixtures
Plasma Phase Transition in Hydrogen-Helium Plasmas
Integral-Equation Approach to Strongly Coupled Plasmas
Equation of State of a Quantum Plasma in the Low-Density Limit
Wigner-Kirkwood Quantum Corrections to the Pair Distribution Function in Dense Plasmas
Fluctuation Properties and Collective Modes of Quantum Plasmas in a Magnetic Field
Giant Planets and the Plasma Phase Transition of Hydrogen
Seismology of Jovian Planets and Brown Dwarfs
Strongly Coupled Plasmas in Uranus and Neptune
Recent Theoretical Results on Brown Dwarf Properties and Evolution
The Heavy-Element Contribution to the Equation of State of the Solar Interior: The Diagnostic Potential of Helioseismology
Isochores of a Quantum Plasma Near the Fully Ionized Limit. Application to the Sun
Kinetic Properties of Neutron Star Cores
Reduction of Direct URCA Process by Nucleon Superfluidity in Neutron Star Cores
Topics on the Equation of State in Metals and Cold Stars
Intense Shock and Rarefaction Waves in Strongly Coupled Plasmas
Electrical Resistivity and Equation of State Measurements of a Dense Aluminum Plasma
Measurement of Electrical Conductivity of a Strongly Coupled Metal Plasma
Dynamics of Strongly Coupled Cathode Microplasmas
Measuring Opacity of Shock Generated Argon Plasmas
Ionization Kinetics in Strongly Coupled Plasmas
Partially Ionized Dense Plasmas - Theory of Equilibrium and Nonequilibrium Properties
Pressure Induced Ionization and the Spectra of Reduced Density Matrices
Thermal Equilibrium of Dense Hot Plasmas: Calculation of Ionic Level Populations
Ionization Rates in Dense Plasma p. 233
Equation of State and Phase Transitions in Alkali Plasmas p. 237
Recent Progress on Astrophysical Opacity p. 243
Plasma Opacities in Astrophysical Sources - The Opacity Project p. 253
Effects of Strong Coupling on Dense Plasma Light Absorption p. 263
Non-Spherical Thomas-Fermi Atom in a Strong Magnetic Field p. 269
Influence of Non-Ideality Effects on Continuous Spectra in Xenon Plasma p. 273

Heavy Ion Stopping Experiments in Dense Plasmas p. 283
Particle-Driven Inertial Fusion Through Cluster Ion Beams p. 293
Measurements of Plasma Opacity from Strongly Coupled Aluminum and Copper Plasmas p. 299
Dynamical Response and Conductivity in a Dense Plasma p. 303
Unknown Mechanism of Fast-Particle Energy Loss in Strongly Coupled Plasma p. 307
Collisional Equipartition Rate for a Magnetized Plasma p. 309
New Free Energy Models for Non-Uniform Charged Particle Fluid Mixtures as Related to Liquid Structure and Freezing p. 313
Correlational and Strong Coupling Effects on Collective Modes in Plasmas p. 323
Variational Hard-Sphere Approach to a Strong-Coupling OCP Fluid Equation of State Using General Combinations of the Percus-Yevick Entropy Forms p. 333
Brownian Particles in Shear Flow and Harmonic Potentials, a Study of Long Time Tails p. 337

Phase Transition in the Simplest Plasma Model p. 343
Linear Mixing for Thermodynamic Models of Charged Hard Spheres and of Point Charges p. 347
Application to Helium Plasma p. 351
Structural and Dynamical Correlations in Glasses p. 357
Observation of Order-Disorder Transitions and Particle Trajectories in a Model One Component Plasma: Time Resolved Microscopy of Colloidal Spheres p. 367
Crystallization Growth Instabilities in Charged Colloidal Suspensions p. 377
Three-Particle Hydrodynamic Interactions in Suspensions p. 387
Experimental Results on Normal Modes in Cold, Pure Ion Plasmas p. 393
Normal Modes in a Cryogenic Pure Ion Plasma p. 399
Cylindrical Coulomb Crystals p. 407
Microscopic Structure of Classical Charges in Traps and Storage Rings p. 415
Coulomb Clusters - Binding Energies, Microstructures, Shell Model, and Dynamic Stabilities p. 419
Monte Carlo Simulation of the OCP Freezing Transition p. 425
Quantum Monte Carlo Simulation Study of Free Energies and Melting Transitions in Coulomb Solids p. 435
Static Response of 2D Electrons from Quantum Monte Carlo p. 445
Density Functional Simulations for Dense Plasmas p. 455
Quantum Molecular Dynamics Simulation of Electron Transport p. 465
Hierarchical Tree Code for Dense Plasma Simulations 

Molecular Dynamics Studies of Crystalline Nucleation in One-Component Yukawa Plasmas

Simulation of a Strongly Coupled Plasma Experiment

Conference Program
