Preface
Formal Architecture
The formal architecture of Lexical Functional Grammar
Lexical Functional Grammar: a formal system for grammatical representation
Nonlocal Dependencies
Long-distance dependencies, constituent structure, and functional uncertainty
Modeling syntactic constraints on anaphoric binding
An algorithm for functional uncertainty
Constituent coordination in lexical functional grammar
Word Order
Formal devices for linguistic generalizations: West Germanic word order in lexical
functional grammar
Linear order, syntactic rank, and empty categories: on weak crossover
Semantics and Translation
Projections and semantic description in lexical-functional grammar
Situation semantics and semantic interpretation in constraint-based grammars
Translation by structural correspondences
Mathematical and Computational Issues
Three seductions of computational psycholinguistics
Logic and feature structures
A method for disjunctive constraint satisfaction
The interface between phrasal and functional constraints
