Syntax and Computation
Formal devices for linguistic generalisations: West German word order in LFG
Stratified feature for multistratal relational analysis
Feature-based grammar as constraint grammar
Automated Parsing and Generation
A quarter century of computation with transformational grammar
Chunks and dependencies: bringing processing evidence to bear on syntax
Some open problems in head-driven generation
Construction of LR parsing tables for grammars using feature-based syntactic categories
Phonology and Computation
Phonology and computational linguistics a personal overview
Eliminating cyclicity as a source of complexity and phonology
Pitch accent prediction from text-analysis
