Author Index

The Evolution of Metallurgical Education p. 3
Steelmaking Design for Flat Products at Hylsa D.A.P. p. 13
Thin Strip Casting of Ni-Base Alloys by Twin Roll Process p. 19
I.S.P. - Thin Slab Casting and Rolling Concept for Economical Processing of Quality Products p. 23
Thin Slab Casting at ARMCO Mansfield Steel Operations p. 39
Recycling Dusts and Sludges in the BOF p. 47
Production and BOF Recycling of Waste Oxide Briquettes Containing Steelmaking Sludges, Grit, and Scale at Inland Steel p. 51
Use of Waste Oxides in the Great Lakes BOP p. 67
Use of Recycled Iron Oxide in Primary Steelmaking for Improved Yield and Slag Formation p. 73
Reforming of BOF Slag for Synthetic Fluxes p. 79
Start Up of KTB (Oxygen Top Blowing in RH) at National Steel Great Lakes Division p. 87
AK Steel's RH Degasser: Process Improvements at Achieve Production Rates of Over 100,000 Tons Per Month and Sequence Lengths of Over 85 Heats p. 91
The Design and Application of a Recirculating Degasser With a KTB Oxygen Lance at British Steel, Port Talbot Works p. 97
A Process Overview of the No. 1 Steel Transfer Shop at Algoma p. 111
Development of Technology for Producing High Purity Ferritic Stainless Steel by VOD Powder Top Blowing Method p. 119
Implementing ISO 9002 in the Steelmaking Environment p. 127
Sublance Application and Metallurgical Steel Control Methods in European and U.S. BOF-Shops p. 135
Increasing BOF Productivity and Profitability by Quick-Tapping With Drop-In Sensors p. 143
How to Boost BOF Output and Reduce Cost Per Ton of Steel p. 147
The Cooling of Lances - A New Perspective p. 153
Replacement of BOF Steelmaking With a Twin Hearth DC Arc Furnace At Unimetal, Gandrange, France p. 161
Improvements in Desulfurization Performance at Weirton Steel p. 169
An Improved Sequenced Co-Injection Practice for Blast Furnace Hot Metal Desulfurization p. 183
Effect of FeO in Slag on the Desulfurization of Hot Metal p. 191
On Line Measurement of Sulfur in Molten Iron With a Ceramic Electrochemical Cell p. 199
A New Flux Charge Model to Optimize B.O.F. Operating Performance When Using Low Silicon Hot Metal p. 205
Experience of Hi-VAP Cooling on No. 1 BOF at Burns Harbor p. 217
Operating Results Using Post-Combustion Lances at the Bethlehem, PA, BOF Shop p. 225
Results of a New Slag Thickness Measuring System p. 237
Improvements in BOF Production at AHMSA #2 Steel Plant p. 243
Modernization of Slab Continuous Casting in BOF #2 AHMSA p. 249
The Evaluation and Installation of an SEN Quick Change System at Dofasco p. 255
Start-Up of Geneva Steel Ladle Metallurgy Facility and Slab Caster p. 261
Revamping and Operation of Continuous Casting Machine for Stainless Steel at Shunan Works p. 265
The Equipment, Systems, and Processes at the LTV Steel Direct Hot Charge Complex p. 271
The Revamping and Performance Improvement of No. 1 and No. 2 Bloom Continuous Caster p. 281
Optimization of Casting Speed for Higher Productivity on Dofasco's No. 1 Continuous Caster p. 287
Soft Reduction of Continuously-Cast Blooms at Stelco's Hilton Works p. 295
Development of Soft Reduction Technology for the Bloom Caster at Pohang Works of POSCO p. 301
Improvements to the Computer Slab Cut Length Optimization Model at Dofasco's #1 Caster p. 309
Characterisation of Heat Transfer in a Continuous Casting Mold p. 315
Plasma Tundish Heating at Nucor Norfolk - Design Considerations and Operating Results p. 321
Reduction of Depressions on Type 304 Stainless Steel CC Slabs p. 333
Dynamic Secondary Cooling Model for Continuous Casting p. 341
Neural Network Utilization for Break-Outs Monitoring p. 345
Improved Spherical Granular Mold Flux p. 351
Billet Caster Modernization at USS/KOBE p. 355
Solidification of a Slab in a Continuous Casting Mold From the Viewpoint of Heat Transfer p. 359
Development and Performance Results - High Performance Copper Alloy for Continuous Slab Casting Molds p. 369
Alternative Chemical Treatment for Combined Mold and Machine Cooling Systems p. 377
Ferrous Corrosion in Continuous Caster Spray Chambers p. 385
Spray Parameters and Heat Transfer Coefficients of Spray Nozzles for Continuous Casting p. 391
Improvements in Steel Cleanliness at Great Lakes No. 2 Continuous Caster p. 401
Continuous Improvement of Practices to Reduce Tundish Nozzle Clogging p. 415
The Benefits of Continuous Temperature Measurement in the Caster Tundish p. 427
Bloom Cleanliness Correlated to LMF and Casting Parameters p. 431
Improvements in Tundish Slidegate System, Through Employee Involvement and Teamwork p. 439
Mechanisms and Countermeasures of Alumina Clogging in Submerged Nozzles p. 451
Inclusion Modification to Prevent Nozzle Clogging p. 457
Improvements in Ladle-to-Mold Refractories and Argon Distribution to Reduce Nitrogen Pick-Up and Nozzle Clogging at SOLLAC Dunkirk p. 465
Steel Purity in Continuous Casting Tundishes p. 471
Furnace Refractory Maintenance and Slag Splashing p. 481
Understanding and Improving BOF Vessel Taphole Performance Through the Use of Material Design and Installation Techniques p. 487
Reducing Thermally Induced Stresses in BOF Linings p. 491
Extended BOF Vessel Life at Higher Required Tap Temperatures [actual symbol not reproducible] p. 499
Improvement in Refractory of Top and Bottom Blowing Converter (K-BOP) at Chiba No. 1 Steelmaking Shop p. 505
Extension of BOP Taphole Life at Inland's No. 4 BOF Shop p. 513
Improving Steel Ladle Performance: A Systematic Approach to Success p. 523
Benefits Achieved by Converting Continuous Casting Tundishes at Bethlehem Steel's Sparrows Point Division From Brick Safety Linings to Monolithic Safety Linings p. 529
Experience at the Great Lakes Steel KTB Degasser With On-Line Refractory Repairs p. 535
Refractory Linings in Various Steelmaking Environments - Problems Encountered and Corrective Measures p. 541
Steelmaking Ladle Refractories at Dofasco p. 547
Improvement of Steel Cleanliness in Ladle Exchange Period p. 551
Effect of an Alternative Tundish Configuration on Product Cleanliness p. 559
Evaluating Steelmaking and Casting Practices Which Affect Quality p. 563
Improvements in the Internal Quality of Continuous Cast Slabs at Lukens Steel p. 571
The Mathematical Model for Secondary Refining Process Control at Kwangyang Works, POSCO p. 579
The Development of High Temperature Ceramic Foam Filters and Their Practical Use in Continuous Caster Tundishes p. 589
Study of a Tundish Using a 1/3-Scale Water Model p. 593
Expert System for Slab Disposition and Grade Assignment p. 601
Surface Quality Improvement of High Carbon Steels p. 607
Reduction of Pencil Pipe Defects at LTV Steel's Cleveland Works No. 1 Continuous Caster p. 613
Automatic Quality Control of Cast Slabs at the VOEST-ALPINE Steel Works p. 621
Cleanliness Improvements Using a Turbulence-Suppressing Tundish Impact Pad p. 629
Status Report: ASTM Committee C08.11 Standardization Work on Metallurgical Powders p. 639
Standardized Testing of Mold Powder Properties p. 647
Physical Properties of Mold Slags That are Relevant to Clean Steel Manufacture p. 655
Characterisation and Modification of the Heat Transfer Performance of Mold Powders p. 669
Laboratory and Plant Studies on Thermal Properties of Mold Powders p. 679
The Application of Computers to Study the Effects of Jetting During Steelmaking p. 689
RH Degasser Kawasaki Top Blowing Computer Process Control p. 697
Blowing Correction Model for the Q-BOP at U.S. Steel Gary Works p. 709
New Endpoint Control System With Auto-Parameter-Turning in BOF p. 715
Clogging in Continuous Casting Nozzles p. 723
Equilibrium Partition Ratio of C, Mn and Si in a High Carbon Steel p. 737
Slivers in Continuous Casting p. 743
