Author Index

Author Address Listing p. 1005

The Casting and Quality Evaluation of U.L.C. - I.F. Steels on the British Steel, Llanwern, Slab Caster p. 3

Formation of Surface Heat Crack in Low Carbon Steels During Hot Rolling p. 11

Controlling the Occurrence of Silver Defects at Dofasco p. 23

Tertiary Rolled in Scale - The Hot Strip Mill Surface Problem of the 1990's p. 33

Evaluation of the Coefficient of Friction for HSS Rolls From Hot Strip Mill Log Book Data p. 39

Variations of Friction in the Roll Bite and Their Effects on Cold Strip Rolling p. 47

Tribology of Cold Rolling Steel p. 55

Testing Requirements for Characterizing the Surface Roughness of Sheet Steel Products p. 63

The Researches of Roughness Formation on a Cold-Strip Surface p. 71

Effects of Run-Out Table Cooling Profile on the Mechanical Properties of C-Mn and C-Mn-Nb-V Steels p. 79

Prediction of Mechanical Properties of Steel Strips After Hot Rolling p. 89

Intergranular Fracture of Interstitial Free Steels Under Cyclic Loading and Its Effect on Fatigue Life p. 101

How Deep-Drawn Parts Made of Hot-Rolled Sheet Steel Should be Designed p. 115

Outline of Vertical Furnace for Thin Gauge Stainless Steel Strips at Kashima Works of Sumitomo Metal p. 123

The Effect of Steel-Bath Interfacial Reactions on the Surface Quality of Galvanized and Galvannealed Steel Sheet p. 131

Influence of Processing Parameters on Surface Characteristics of Galvanneal Coated Sheet p. 139

Sheet Surface Conditions Causing Blistering of Electrogalvanized Sheet and Evaluation Methods p. 149

Coating Roughness Control on Automotive Coated Steel Sheet p. 157

Mathematical Modelling of the Temper Rolling Process p. 165

Zinc Coated Steel Sheets With Superior Press Formability and Image Clarity p. 173

SIBETEX: The First Deterministic Steel Sheet Surface Texture p. 179

#4 Continuous Pickle Line Automated Surface Inspection System p. 187

The Effect of the EDT Process on the Surface Integrity of Cold Mill Work Rolls p. 197

Lead Modeling for Section Breakdown Mill p. 205

Enhanced Roll Materials for Forged Steel Work Rolls p. 213

Safe Minimum Operating Diameter of Duplex Cast Roll With Shell/Core Interface Separation p. 221

Grinding Rolls for State of the Art Requirements p. 243

Development of Complex Carbide Reinforced Metalworking Rolls p. 253

Trials of High Speed Steel Rolls in SOLLAC Hot Strip Mills p. 261

The Performance of High Speed Steel Rolls at Dofasco p. 267

The Use and Performance of HSS Rolls at Inland's 80" Hot Strip Mill p. 271

Development and Application of High-Speed Tool Steel (HSS) Rolls in Hot Strip Rolling p. 275
Prediction of Ae3 Temperature of Steel Using Neural Network and Genetic Algorithm p. 565

IKEM, An Interactive Knowledge Based System for Discovering and Validating Metallurgical Knowledge p. 579

Determining Material Routings at a Specialty Steelsmaker Using an Integrated Rule-Based Router System p. 587

Generalised Decision Support System for Diagnosis p. 597

The Automated Self-Learning System to Control Rolled Stock Quality p. 605

Effect of Processing Parameters on the Stored Energy During Multi-Pass Deformation of a Nb-Bearing Steel p. 769

Comparison of Hot Working Behavior of Austenitic and Ferritic Stainless Steels p. 883

Thermomechanical History of Steel Strip During Hot Rolling - A Comparison of Conventional Cold-Charge Rolling and Hot-Direct Rolling of Thin Slabs p. 617

Effect of Cooling and Deformation on the Austenite Decomposition Kinetics p. 635

Dynamic Recrystallisation in Rod Rolling p. 651

Recrystallization During Strip Rolling of Nb-Ti HSLA Steels p. 661

Flow Behavior and Critical Stain for Dynamic Recrystallization in HY-100 Steel p. 669

On the Nucleation Kinetics of Static Recrystallization p. 679

The Effect of Niobium on the Recovery of Deformed Austenite p. 689

Effect of Precipitation on the Recrystallization Behavior of Nb and V Containing Steels p. 695

The Effect of Carbon Content During Hot Deformation of Austenite p. 705

Ferrite Grain Refinement by Large Reduction Per Pass in Non-Recrystallization Temperature Region of Austenite p. 711

Recrystallization Characteristics and Grain Growth Behavior in Nb-(C-N)-Microalloyed Steels p. 721

Study of the Static Recrystallization Critical Temperature (SRCT) in Microalloyed Steels p. 735

Determination of the T[subscript R] and Ar[subscript 3] Temperatures From Roll Force Measurements p. 743

Effect of Test Variables on Q[subscript HW] and Tnr p. 759

Effect of Processing Parameters on the Stored Energy During Multi-Pass Deformation of a NB-Bearing Steel p. 769

An AI System for the Prediction of Flow Response in Hot Working p. 785

Static Recrystallization Behavior of Austenite in HSLA-100 During Thermomechanical Processing p. 791

Macro- and Micro-Modeling of Hot Rolling of Steel Coupled by a Micro Constitutive Relationship p. 805

The Effect of Hot-Working Conditions on the Austenite Decomposition in SAE 4120 Steel p. 819

Recovery and Recrystallisation in Electrodeposited Iron Foil p. 835

Recovery and Recrystallization in 3%-Silicon Steel After Hot Deformation p. 843

A TEM Study of Recrystallization-Related Sensitization in 304 Stainless Steel Deformed at Liquid Nitrogen Temperature p. 849
Static Recrystallization in Austenitic and Ferritic Stainless Steels Investigated
by the Stress Relaxation Method
Study of Restoration Processes and Texture Evolution in Ferritic Stainless Steels
Comparison of Hot Working Behavior of Austenitic and Ferritic Stainless Steels
Influence of Mn Content and Precipitates on Recrystallization Texture Formation in
Cold-Rolled Sheet Steels
Vanadium in Interstitial-Free Steels
Probable Mechanism on the Recrystallization Texture Formation in IF-Steel
The Effect of Precipitates on the Recrystallization of IF Steels
Effect of Carbonitride Formers (Zr, Ti, Nb) on Recrystallization Behavior in
Extra-Low Carbon Steel
Effect of C, Mn, P and Processing Conditions on Mechanical Properties and
Recrystallization Temperatures of High Strength Cold-Rolled Low Carbon Steels
A Recrystallization Model for Al-Killed Low-Carbon Steels
A Comparison Between the Recrystallization Behaviors of Warm and Cold Rolled Ferrite
Influence of AlN Precipitation on Continuous Annealing of Low Carbon Steels
The Application of Thermoelectric Power Measurements to the Study of the Recovery and
Recrystallization in Cold-Rolled High Strength Low Alloy (HSLA) Steel Sheet
Effect of Second Phase Particles on Recrystallization and Subsequent Grain Growth in
Cold-Rolled Electrical Steels
