Author Index

Who Was Henry Howe? p. 699
Model of Inclusion Removal During RH Degassing of Steel p. 3
CSP Plant Start-up at Steel Dynamics Inc p. 37
An Accelerated Start-Up of USS/KOBE's Vacuum Tank Degasser p. 47
The Conversion of Dofasco's No. 1 CC From 254 mm to 216 mm p. 53
LTV DHCC Synthetic Slag Practices p. 57
Three-Phase (Steel, Slag, Gas) Modeling of the CAS-OB Process p. 63
Developing Slag Control Practices at Acme Steel Company p. 69
Physical Modeling of BOF Slag Splashing p. 83
Installation and Start-up of Slag Splashing at Algoma Steel Inc p. 87
Desulfurisation for Thin Slab Casting p. 103
Improvement of the Productivity at KSC's Mizushima Works by Enlarging the Heat Size p. 109
Increasing BOF Production Without a Large Capital Investment p. 115
Improvement of RH Refining Technology for Production of Ultra-Low Carbon Steel at Kwangyang Works, POSCO p. 121
Development of Technology for Producing Ultra Low Sulphur Steel by RH Powder Top Blowing Method p. 127
Development of Computer Control System for the RH Degasser at POSCO Pohang Works p. 131
Removal of Copper and Tin in Molten Iron With Decarburization Under Reduced Pressure p. 139
Clogging of the Submerged Entry Nozzle During the Casting of Titanium Bearing Stainless Steels p. 145
Mould Flow Monitoring at No. 3 Slab Caster, Krupp Hoesch Stahl AG p. 153
High Power In-Mold Electromagnetic Stirrer - Improvement of Surface Defects and Inclusion Control p. 159
Innovative Clogging Prevention and Mold Flow Optimization by the Whirl SEN p. 165
Application of EMBR for the Control of Molten Steel Flow in the Continuous Casting Mold p. 173
Analysis of Thermal and Mechanical Behavior of Copper Molds During Continuous Casting of Steel Slabs p. 183
Computerized System for Caster Roll Management and Performance Tracking p. 205
Slab Width and Length Control at the Burns Harbor Casters p. 209
The Design of Continuous Casting Mold Fluxes Using Empirical Data p. 215
Three-Dimensional Slab Deformation of Solidifying Shell at Intermediate Bearing During High Speed Continuous Casting p. 223
Modeling of Phase Transformations and Solid Shell Resistance in Continuously Cast Steel Slabs p. 227
Continuous Casting of High-Carbon and Alloy Steel Billets with in-Mold Dual-Coil Electromagnetic Stirring System p. 243
Mould Level Fluctuations During Billet Casting at Hoogovens BOS No. 1 p. 255
Practice, Process and Equipment Improvements Implemented at the Sparrows Point Caster p. 265
Practice Developments on the No. 2 Caster; British Steel Llanwern Works p. 273
Advanced Technology for the Unsteady Stage Slab Quality at Kashima Steelmaking Plant  p. 279

An Investigation of Some Mold Powder Related Startup Problems  p. 285
Automated Tundish Drain Control  p. 297
Development of Non-Oxidizing Heating System for Tundish by High Temperature Nitrogen Gas Jet  p. 307
Use of Flow Modifiers to Improve Performance of a Tundish  p. 313
Analysis of Steel Flow and Heat Transfer in a Tundish Heated by Plasma Through Physical and Mathematical Modeling  p. 325
Computational Fluid Mechanics Applications in Continuous Casting  p. 337
Prevention of Transverse Cracking in Microalloyed Continuously Cast Slabs by Microstructure Control  p. 345
Transverse Cracking Prevention and Segregation Reduction in Slab Continuous Casting  p. 351

Surface Defects Improving of IF Steel at China Steel Corporation  p. 359
Transverse Corner Crack Formation in Continuously Cast Slabs  p. 365
Behavior of Argon Bubbles During Continuous Casting of Steel  p. 375
Full Scale Water Modeling of Fluid Flow Phenomena in a Continuous Caster Mold During Start-Up Conditions  p. 385
Physical Modeling of Slag Behavior at High Rates of Gas Injection  p. 393
Break-up of Liquid Drops Impacting on the Surface of Immiscible Liquids  p. 403
Vortex Formation and Chaotic Fluiddynamic in Continuous Casting Mould  p. 413
Implementation of a Ladle Slag Oxygen Activity Sensor to Optimize Ladle Slag Practices at the U.S. Steel Mon Valley Works  p. 429
Process Improvements in HSLA Calcium-Treated Steels  p. 437
Prediction of Soluble Aluminum in Titanium Stabilized ULC Grades  p. 441
Innovative and Cost-Effective Techniques for Extending Ladle Life  p. 451
Progress in Steel Ladle Refractories Techniques  p. 455
Ladle Refractory Improvements and Maintenance at Wheeling Pittsburgh Steel  p. 461
Improved Steel Ladle Practice Under a Performance Based Refractory Supply Agreement  p. 467

Magnesia - Graphite Products in the Steel Industry: Environmental and Recycling Aspects  p. 475

Longer Life in RH With Oxygen Top Blowing System  p. 483
Total Quality Teamworking Reduces Refractories Costs  p. 487
Introduction to BOF Relining Equipments  p. 495
Equipment Systems for Shotcasting Steel Ladles  p. 501
Solidification Control Versus Liquid Steel Temperature - A Review  p. 513
Improving Productivity and Quality Through Control of the Steel Temperature in the Tundish  p. 521
Temperature Compensation and Control in the Continuous Casting Tundish: Physical and Mathematical Modelling  p. 529
Quality and Operational Benefits of Continuous Tundish Temperature Measurement at British Steel Teesside Works  p. 535
CC Process Optimization Through an Improved Thermal Modeling of the Cast Steel Products  p. 539
