Author Index

Modeling of the Continuous Casting of Steel - Past, Present and Future

Behavior of Liquid and Solid Inclusions at Advancing Planar and Cellular Fronts During the Solidification of Steels

Grain Refinement of Fully Austenitic Stainless Steels Using a Fe-Cr-Si-Ce Master Alloy

Influence of Ferrochromium Additions on Inclusions in Steel

Some Ideas of Determining the Macro Inclusion Characteristics During Steelmaking

Use of Briquetted Coke Breeze as Charge Carbon in the Electric Furnace

New Technology for the Manufacture of Cast Copper Cooling Blocks

Statistical Analysis and Optimization of EAF Operations

SVC Light: A Flicker Mitigator for Steel Manufacturing

Transformer Life Assessment and Advanced Diagnostic as Tools in Pro-Active and Advanced Risk Asset Management

Adopting the IEC Voltage Flicker Methodology in the United States

Service and Maintenance of Electric Arc Furnace Transformers

Hydraulic Piping Systems - Mechanical Joint vs. Welded

The Joslyn Furnace Switching Solution - New Developments, Maintenance Benefits and Practices

Preventative Maintenance Techniques as Applied to Electromagnetic Stirrers for Billet and Bloom Casting Machines

New Refractory Cement for Magnesia-Carbon Bricks

Elimination of Ladle Fume Emissions

Shotcreting Monolithic Steel Ladle Safety Linings at Dofasco

Behavior During Preheating of Stopper Rod and SEN

Corrosion Behavior of Al\textsubscript{2}O\textsubscript{3}-C Based Refractories in Melts of Smelting Reduction with Iron Bath

Alumina and Magnesia-Based Castables Containing Graphite: A Comparison

Achieving MgO Saturated Foamy Slags in the EAF

Reactions Between Refractories and Molten Iron in Steelmaking Processes

Evaluating Practices to Reuse/Recycle Spent Refractory Materials in the Steel Industry

Economical Iron Production in the Submerged Arc Furnace

Enhancing Electrochemical Reactions in Smelting and Refining Operations

Success of VAI’s VAINOX Technology in Latest Stainless Steel Projects

The Steelmaking and Casting of Ti Stabilized Stainless Steels

Numerical and Experimental Study of Tundish Flow During Continuous Casting of Stainless Steel

Effects on Steel Surface and Slag Movement During Heating with Electrodes

Steel from Hot Metal Melted by Oxy-Fuel Furnaces - Energy, Environment, Cost and Quality Benefits

New Technology for Oxygen Introduction in the Electric Arc Furnace

Scrap Melting in an Oxy-Fuel Fired Rotary Furnace

Oxyfines - A New Technology for Direct Recycling of EAF Dust and Sludge
Simulation and Validation of Multiphase Flows in Gas Stirred Vessels

CFD Simulation of Post Combustion in the Electric Arc Furnace - Part I: Model Development and Application to Flat Bath

DC Furnace Improvements at SMI Steel - Alabama

North American Refractories Company ZAAG (Zero Air Aspiration Gate) Ladle Shrouding System Used at Steel Dynamics, Inc. USA's First Installation

Cannonballs to Consteel - Ameristeel - Knoxville's Melt Shop Modernization

Operational Improvements Achieved in Davsteel (Division of Cape Gate (Pty) Ltd. South Africa, Utilizing the New Techint KT Injection System and TDR Digital Regulation: A Case Study

Laser Analysis of CO and Oxygen in EAF Off-Gas

Improvement of De-S Efficiency Using Slag Volume Measuring in Ladle Furnace

Study on the Discharging Property of Tundish Slag for an Improved Hot-Tundish Recycling Process

Study on the Chemical Aspects of the Non-Metallic Inclusions in Ladle Treatment

Orinco Iron Alloy HBI (Closing the Energy Gap)

Use of Circa HBI in EAF Steelmaking at North Star Steel - Texas

Direct Reduction / EAF Steelmaking - The Environmentally Friendly Route

Zinc Recovery from EAF Dust by the Iron Reduction Distillation Process

The Shinseiko Project: Advanced Packed Bed Type Steel Scrap Melting Process

Numerical Modeling of Enhanced Nitrogen Dissolution During Gas Tungsten Arc Welding

Thermocouples - What Temperature Are They Measuring?

Modeling of Oxygen Lance Jets

Factors Influencing the Total Energy Consumption in Arc Furnaces

Implementation and Operating Results with CoJet Gas Injection System at SIDOR with DRI Charging

Efficient Steelmaking Has Environmental Benefits

The CASTRIP Process for Twin Roll Casting of Steel Strip

Off-Gas Measurements for Mass and Energy Balances of a Stainless Steel EAF

Solidification of Mould Fluxes

Crack Occurrence on the Surface of AISI 304 Stainless Steel Strip Produced by Strip Casting Process

Methodology for Metallographic Study of Defects in Carbon Steel Long Products

Real Time Characterization of Metals Continuously in Hot EAF Fumes

Continuous Charging of Hot Metal and Preheated Scrap in the EAF

Mathematical Modeling of the EAF Process Using Direct Reduced Iron

Distribution of Vanadium Between Molten Iron and CaO-SiO\(_2\)-MgO\(_{sat}\)-FetO Slag
