Author Index

60 Years of Electric Furnace Conferences - A Retrospective on Arc Technology p. 3
Historical Perspective on Casting Technologies and Equipment Evolution p. 11
Historical Perspective on Energy Consumption and Future Opportunities for Conservation in the U.S. Steel Industry p. 23
Long Arc Operation p. 37
Improved Understanding of Feed Materials with Respect to Optimizing EAF Operations p. 47

The End of "Visual Inspection" for Monitoring Scrap Quality p. 59
Reticulated Filtration of Large Ferrous Casts and Castings p. 71
Burnjector - High Efficiency Coaxial Supersonic Injector p. 81
How to Operate EAF Systems Safely Using Vacuum Type Furnace Breakers p. 93
Multiple Harmonic Filter Design to Maximize Furnace Power and Comply with IEEE Harmonic Limits p. 107
Scantrol: For an Automatic Refractory Measurement and Maintenance System p. 119
Industry/Government Research Partnership to Improve the Energy Efficiency and Productivity of EAF Steelmaking p. 131
Understanding Energy Use in the EAF p. 141
Optimizing Chemical Energy Using Goodfellow EFSOP Technology p. 155
Improvements in Arc Furnace Electrical Efficiency p. 169
Future Green Steelmaking Technologies p. 175
Rebuilding of a 48 MVA Furnace in 41 Days p. 195
Ferromanganese Production - Process Understanding p. 205
Advanced Packed Bed Type 100% Scrap Melting Process for Both EAF Works and Integrated Steel Works p. 219

FASTEEL: The Hot Metal of FASTMELT and the Continuous Scrap Feeding of CONSTEEL p. 231
"As Fast As Possible" Makes Cheapest Steel p. 241
EAF Melt Shop with CONSTEEL and Hot Metal Charging p. 251
A Re-Engineered DR Plant for Quality, Low Cost Onsite DRI Production p. 261
The Behavior of Al[subscript 2]O[subscript 3]-CaO Inclusions in Low Carbon Al-Killed Steel During Solidification p. 275
Reoxidation: The Cause of Nozzle Clogging p. 287
The Effect of CaF[subscript 2] on Thermodynamics of CaO-CaF[subscript 2]-SiO[subscript 2]-Al[subscript 2]O[subscript 3](-MgO) Slags p. 297
Oxidation Equilibria in Electric Arc Furnace Liquid Steel Under Low V-Ratio Practice p. 307

Measurement of Oscillating Temperatures Using Subsurface Thermocouples p. 319
World's First Commercial Twin-Drum Strip Casting Process at Hikari Works of Nippon Steel Corp p. 333
Study of Inclusion Flotation in a Continuous Casting Tundish p. 343
Observations of Peritectic Solidification in the Iron-Nickel System p. 353
The Integrated Environmental Protection Concept of the Badische Group p. 367
CONSTEEL TO FASTEEL: The Future of Steelmaking p. 377
Improving Gas Conditioning in Electric Arc Furnaces p. 387
Modeling Post Combustion of EAF Off-Gases Using CFD  
Experiments on Removal of Zinc from EAF Dust Using Ferrous Choloride  
Electrometallurgical Relationships in Electric Smelting Furnaces  
The Application and Scale-Up of AC and DC Smelting Furnaces for Ferroalloys  
Cost and Operational Benefits of Replacing Al with Si as the Primary Deoxidant of Low O and S Steel  
Beam Blank Casting Technology - Start-Up and Operational Results at PTG, Peine, Germany and Ameristeel, Cartersville  
Effect of Casting Parameters of Stirring Flow Velocity and its Control in Continuous Casting Molds  
Reoxidation Behavior of Molten Steel Containing Al and Ti  
The Status of Twin Roll Strip Casting Process for Steel Strip in POSCO/RIST  
Some Experimental Studies of Coal Injection into Slags  
Measurement of Ladle Slag Oxygen Activity Using an Electrochemical Sensor  
Improvements in EAF Operation by the Use of Refining Simulation Tools Mass-Balance Programs for Foaming Slag  
The Thermomechanical Behavior and Economy of Lightweight, Insulative Dry-Vibratable for the Tank Lining of Iron and Steel Ladles  
Improved Ladle Refractory Performance at Georgetown Steel by Means of an Automated Magnesite Veneer Application  
Analysis of EAF Refractory Maintenance Using Electronic Data Collection  
Developments in the Refractory Technology of Electric Arc Furnaces in the Last Decade  
Not All RHF's Are Created Equal: A Rotary Hearth Furnace Primer  
Steel Mill Waste (EAF Dust) Processing on a Rotary Hearth Furnace to Recover Valuable Iron Units and Zinc Oxide  
FASTMET: Proven Process for Steel Mill Waste Recovery  
Ladle Residue Dumping Air Emission Control at QIT-Fer et Titane, Tracy, Quebec, Canada  
Recycling of Zinc Bearing Residues with the PRIMUS Process  
Advanced EAF & LF Process Optimization with Metallurgical and Thermal Models and Theip. Integration into Plant Information and Management Systems  
Analysis of Thermo-mechanical Behavior in Billet Casting  
Use of DRI and HBI for Nitrogen Control of Steel Products  
Implementation of Pyrejet Technology in Electric Arc Furnaces at Siderrugica Barra Mansa  
Maintaining and Increasing Electro-Magnetic Stirring Unit Service Life and Performance via the Water System  
Remanufacturing VBT Vacuum Interrupter Modules  
Crystallization of Continuous Casting Mold Fluxes  
Dynamic Flow Behavior in the Tundish: Optimization of Grade Transitions  
Interfacial Phenomena During Interactions of Metal and Carbon-Bearing Refractories - Wettability and Carbon Transfer  
The Fundamentals of Using Custom-Designed Slags to Remove Impurities from Liquid Steel
Development of Degasser Slag Conditioning Practices at United States Steel Corp. Gary Works  p. 779
The Characterization of Oxygen in Metal/Slag Reactions  p. 787
Ladle Slag Practice - Bridging the Gap Between Theory and Practical Steelmaking Concerns  p. 797
Alloys, Metals and Slag Solidification Process Alternatives and Applications  p. 807
Inferential Model of Desulfurization for Ladle Metallurgy  p. 819
Making Round Bars with Flat Dies Using Six Sigma Techniques for the Battle of the Bulge  p. 831
Ladle to Tundish Transfer Improvements at J&L Specialty Steel  p. 843
Influence of Melt Chemistry on Stainless Steel Powders  p. 855
A Model Description of the Vacuum Oxygen Decarburization Process for Stainless Steel Production  p. 871
Influence of AIS Chemistry on EAF Steelmaking Economics  p. 885
Use of Circal HBI in EAF Steelmaking  p. 905
An Improved Method of Applying Chemical Energy into the EAF  p. 917
Melt Shop Process Information System at SMI - Texas  p. 927
Is Pig Iron Vital to Electric Furnace Users?  p. 939
Using Oxygen to Make Reducing Gas in the MIDREX Direct Reduction Process  p. 951
