On the Cleavage Fracture of a High Strength Maraging Steel
The Mechanism of Property Enhancement in M2 Tool Steel by Cryogenic Treatment
Hot Ductility and Effect of High Temperature Deformation in In-Situ Solidified Microalloyed Steels
Effect of Very High Temperature Deformation on Hot Ductility of a Peritectic Steel Containing Vanadium
Effects of Niobium Content and Heat Treatment on the Microstructure and Mechanical Properties of Railroad Tank Car Steel Plates
The Kinetics of VC Precipitation in Microalloyed Hypereutectoid Steels
Effects of Vanadium and Silicon Additions on Microstructure and Mechanical Properties of Hypereutectoid Steels
In Mill Measurement of Work Roll Young's Modulus
Dofasco No. 2 Hot Mill Profile/Flatness Performance and Finishing Mill Work Roll Practices
A Study of the Temperature at the Interface of the Work Roll and the Thin Scale Layer on a Low Carbon Steel During Hot Rolling
Development and Application of High Speed Steel Rolls for Long Products
Development of New Backup Roll for Strip Shape Control
Carbide Enhanced High Chrome Iron and Steel Work Rolls for Rolling Flat Products
Development of 590 Mpa Grade High Strength Cold Rolled Steel Sheets for Automotive Structural Parts
Aluminum Rich TRIP-Aided Steels: Effects of Alloy Additions and Processing
A Family of 590 Mpa High Strength Steels with Various Microstructures
Effect of Boron Addition on the Microstructure and Mechanical Properties of Hot Rolled Low Carbon Steels
Bake Hardenability of Multiphase High Strength Automotive Sheet Steels
Physical and Numerical Modeling of Plastic Deformation of Steels in Two-Phase Region
Mathematical Modeling of Austenite Conditioning During Hot Strip Rolling at Usiminas
The Influence of [alpha]>[gamma] Transformation on the Grain Coarsening Temperature of Ti-Nb Microalloyed Steels
The Nucleation of Ferrite from a Coarse Grained Austenite During the Slow Continuous Cooling of an HSLA Steel
Study of the Austenite Decomposition in Low Carbon Steels with Microalloy Additions
Aging of Medium-C Martensite and High-C Mestastable Austenite: A Neutron Diffraction Study
Connecting the Roll to the Power Train - The Roll End Casing
Monolith Design - Roll Grinder Technology
Roll Cool-Down Facility at the ISG Burns Harbor HSM
Portable Hardness Testing in the Iron-Steel Industry
Case at EKO Stahl Where Combined Eddy Current (ET)/Ultrasonic (UT) Roll Inspection Minimizes the Number of Major Mill Accidents
Friction Stir Welding of Dual-Phase Sheet Steel
On the Spot Welding Behavior of Galvannealed Steel Trip for Automotive Applications
Tensile-Shear Spot Weld Fatigue Behavior of High Strength Steels

Metallurgical Aspects of the Fatigue Performance of Soft and High Strength IF Steels

Fatigue Performance of IF and High Strength IF Steel Grades

Phase Transformation and Processing of High Strength Steel

Effect of Annealing Parameters on Austenite Decomposition in a Continuously Annealed Dual-Phase Steel

Effect of Mn on the Stability of Austenite in a Continuously Annealed Dual-Phase Steel

Effect of Annealing Parameters on the Structure and Properties of Intercritically Annealed Steels Intended for Hot Dipped dual-Phase Applications

Properties of Austenite in Microalloyed C-Mn-Al-Si-P TRIP Steels

Cold Drawing of Tubes on a Movable Mandrel

User-Oriented Three-Dimensional Finite Element Modeling of High Speed Bar and Rod Rolling

Development of Direct Annealing Treatments After Hot Working in Alloyed Steels

Bar and Rod Mill Modeling System for Improved Roll Pass Design and Process Selection

Effects of Microstructure on Strength-Flange-Formability of Cold Rolled Ultra High Strength Steels

Evolution of Deformation-Induced Surface Morphologies Developed in Fe-Based Sheet Metals

Effects of Chemical Compositions and Processing Conditions on Mechanical Properties of Ti-Nb Added Interstitial Free High Strength Steel (IF-HSS)

Effect of Heat-to-Coat Treatments on the Properties and Microstructure of High Strength Hot Rolled Steels

Galvannealing Cycles Effects on Substrate/Coating Interfacial Structures Observed by Mossbauer Spectroscopy

Routine Analysis of Chemistry, Microstructure and Texture of the Inhibition Layer on Hot Dip Galvanized Steel

Simulation of Oil-Canning Tests on Closure Assemblies

Strip Shape Simulation Software for Continuous Cold Rolling Process

Development of Surface Structures on Austenitic Stainless Steels Under Conditions Simulating Hot Steckel Rolling

Columnar Structure in Hot Bands Formed by the Ar[subscript 3] Transformation During Hot Working

Numerical Modeling of Induction Heating of Steel Bars in POSCO Thin-Slab Rolling Process
