Requirement Analysis Evolution through Patterns  p. 197
Automatic Generation of Use Case Diagrams from English Specifications Document  p. 203
REM4j - A framework for measuring the reverse engineering capability of UML CASE tools  p. 209

FlexUML: A UML Profile for Flexible Process Modeling  p. 215
A Formal Specification for Product Configuration in Software Product Lines  p. 221
Designing a Platform-Independent Use-Case for a Composite Application using a Reference Architecture  p. 227
Synchronization of UML Based Refactoring with Graph Transformation  p. 232
Using Formal Composition of Use Cases in Requirements Engineering  p. 238
Real-Time Trust Management in Agent Based Online Auction Systems  p. 244
Geometric Thumbnails For Web Searching  p. 251
ADkwik: Web 2.0 Collaboration System for Architectural Decision Engineering  p. 255
Improving Usability of Web Systems with Similar Business Objectives  p. 261
Processing Manipulations of Context Information on the Web  p. 268
A Tag-Level Web-Caching Scheme for Reducing Redundant Data Transfers  p. 274
Methodology for Reusing Human Resources Management Standards  p. 280
An Adaptive Resource Management Approach for a Healthcare System  p. 286
Study of the Relationships between Personality, Satisfaction and Product Quality in Software Development Teams  p. 292
Towards Constructing High-available Decentralized Systems via Self-adaptive Components  p. 296
SAFES: A Static Analysis for Field Security in Java Components  p. 302
Reuse of Database Access Layer Components in JEE Product Lines: Limitations and a Possible Solution (Case Study)  p. 308
Design of Wrapper for Self-Management of COTS Components  p. 314
QoS-Optimized Integration of Embedded Software Components with Multiple Modes of Execution  p. 320
A C++ Framework for Developing Component Based Software Supporting Dynamic Unanticipated Evolution  p. 326
Representing Design Rationale to support Reuse  p. 332
Telling Stories about System Use: Capturing Collective Tacit Knowledge for System Maintenance  p. 337
Evolution and Runtime Monitoring of Software Systems  p. 343
On Modern Debugging For Rule-Based Systems  p. 349
Graphical Notation for Natural Language and Knowledge Representation  p. 361
A Hybrid Approach for Natural Language Query Translation  p. 368
Effective Fault Localization using BP Neural Networks  p. 374
Temporal Software Change Prediction Using Neural Networks  p. 380
Do Neural-Network Question-Answering Systems Have a Role to Play in the Deployment of Real World Information Systems?  p. 386
Knowledge Conversion in Software Development  p. 392
A Language Facilitating Informal Reasoning about Programs  p. 396
Evaluating the Efficiency of Retrieval Methods for Component Repositories p. 404
Benchmarking the RDF(S) Interoperability of Ontology Tools p. 410
A Deep Classification of Temporal Versioned Integrity Constraints for Designing Database Applications p. 416
Generating Linear Temporal Logic Formulas for Pattern-Based Specifications p. 422
Ontology Based Classification Generating Method for Browsing-Based Component Retrieval p. 428
A Context-Dependent Semantic Distance Measure p. 432
A Semantical Change Detection Algorithm for XML p. 438
XML Schema Evolution by Context Free Grammar Inference p. 444
Improving Separation of Concerns in the Development of Scientific Applications p. 456
Pattern-based J2EE Application Deployment with Cost Analysis p. 462
Exploratory Design of Derivation Business Rules Using Query Rewriting p. 467
Classification of Design Pattern Traits p. 473
A Proposal for a Conceptual Data Warehouse Quality Model p. 477
Integrating Complex Data into a Data Warehouse p. 483
Learning from Software Quality Data with Class Imbalance and Noise p. 487
Architectural Elements Recovery and Quality Evaluation to Assist in Reference Architectures Specification p. 494
EvoSpaces: 3D Visualization of Software Architecture p. 500
Ontobrowse: A Semantic Wiki for Sharing Knowledge about Software Architectures p. 506
Building Business Considerations into Enterprise Application Designs p. 513
Incremental effort prediction models in Agile Development using Radial Basis Functions p. 519
BASS: Business Application Support through Software Services p. 523
Using Model-Driven Pattern Matching to derive functionalities in Models p. 529
A Model-driven Approach to Architecting Secure Software p. 535
An Intelligent Agent of Automatically Notify Services p. 541
A Proposal for a Decentralized Multi-Agent Architecture for Virtual Enterprises p. 546
Traceability for Agent-Oriented Design Models and Code p. 552
ONTOMADEM: An Ontology-driven Tool for Multi-Agent Domain Engineering p. 559
A Three Level Multi-agent Architecture to Foster Knowledge Exchange p. 565
An Agent Based System for Search in Distributed Environments p. 570
Tree Hash Under Concurrency Control p. 574
Query Processing in Paraconsistent Databases in the Presence of Integrity Constraints p. 580
An Object-Oriented Approach to Storage and Retrieval of RDF/XML Documents p. 586
CXPath: a Query Language for Conceptual Models of Integrated XML Data p. 592
OWLed: Extending Knowledge for Web Ontology Language p. 598
Using Ontologies to Represent Software Project Management Antipatterns p. 604
Service Composition Using Planning and Case-Based Reasoning p. 610
MDA-based Ontology Development: A Study Case p. 616
Towards Domain-Centric Ontology Development and Maintenance Frameworks p. 622
Service Oriented Architecture Empirical Study p. 628
Semantic Support to Reformulate Public Services in Terms of Life Events p. 632
A Component-Based Solution and Architecture for Dynamic Service-Based Applications p. 637
Adequacy of Composite Parametric Software Reliability Models p. 643
Evaluation of the OORT Techniques for Inspection of Requirements Specifications in UML: an empirical study p. 649
DALICA: Intelligent Agents for User Profile Deduction p. 660
An Approach to Multimodal Input Interpretation in Human-Computer Interaction p. 664
Sketch Style Recognition in Human Computer Interaction p. 670
Human-Computer Interaction for a Novel Arm-wrestling Robot p. 676
Managing XML Versions and Replicas in a P2P Context p. 680
Knowledge sharing through a simple release planning method for web application development p. 686
Distributed BPEL Processes p. 692
SAM: Semantic Advanced Matchmaker p. 698
A development platform for distributed user interfaces p. 704
A Dynamical System Approach to Intrusion Detection Using System Call Analysis p. 710
Multi-level Anomaly Detection with Application-Level Data p. 718
A Four-layered Semantic Grid Architecture p. 724
Performance Analysis of the Active Object Pattern in Middleware p. 730
Software Documents: Comparison and Measurement p. 740
Workflow Management and Service Oriented Architecture p. 749
Implementing Agile Development - More than Changing Methodology p. 751
Knowledge Modelling using UML p. 755
