Special Article
Julian Theodore (Buz) Hoff 1936-2007
p. XI

Hoff Fellowships
p. XIII

Experimental intracerebral hemorrhage - iron, hemoglobin and free radicals

Deferoxamine therapy for intracerebral hemorrhage
p. 3

Bilirubin oxidation products, oxidative stress, and intracerebral hemorrhage
p. 7

Deferoxamine reduces brain swelling in a rat model of hippocampal intracerebral hemorrhage
p. 13

The antioxidant effects of melatonin after intracerebral hemorrhage in rats
p. 19

Poly(ADP-ribose) polymerase activation and brain edema formation by hemoglobin after intracerebral hemorrhage in rats
p. 23

Induction of autophagy in rat hippocampus and cultured neurons by iron
p. 29

Effects of superoxide dismutase and catalase derivates on intracerebral hemorrhage-induced brain injury in rats
p. 33

Metallothionein and brain injury after intracerebral hemorrhage
p. 37

Experimental intracerebral hemorrhage - inflammation and thrombin

Intracerebral hemorrhage injury mechanisms: glutamate neurotoxicity, thrombin, and Src
p. 43

Increase of brain thrombin activity after experimental intracerebral hemorrhage
p. 47

Microglial activation and intracerebral hemorrhage
p. 51

Concomitant intracerebral infusion of tissue plasminogen activator and thrombin leads to brain injury
p. 55

Microglial activation and brain injury after intracerebral hemorrhage
p. 59

Effects of aging on complement activation and neutrophil infiltration after intracerebral hemorrhage
p. 67

Experimental intracerebral hemorrhage - other mechanisms

Blood-brain barrier function in intracerebral hemorrhage
p. 73

Treatment of stroke and intracerebral hemorrhage with cellular and pharmacological restorative therapies
p. 79

Deficiency of CD18 gene reduces brain edema in experimental intracerebral hemorrhage in mice
p. 85

Tissue inhibitor of matrix metalloproteinase-3 (TIMP-3) lacks involvement in bacterial collagenase-induced intracerebral hemorrhage in mouse
p. 89

Radial glia marker expression following experimental intracerebral hemorrhage
p. 95

Long-term effects of melatonin after intracerebral hemorrhage in rats
p. 99

Management of delayed edema formation after fibrinolytic therapy for intracerebral hematomas: preliminary experimental data
p. 101

Erythropoietin attenuates intracerebral hemorrhage by diminishing matrix metalloproteinases and maintaining blood-brain barrier integrity in mice
p. 105

Hyperbaric oxygen for experimental intracerebral hemorrhage
p. 113

Effect of amantadine sulphate on intracerebral hemorrhage-induced brain injury in rats
p. 119

Experimental intracerebral hemorrhage - model development and characterization

Long-term behavioral characterization of a rat model of intracerebral hemorrhage
p. 125

Neurological deficits and brain edema after intracerebral hemorrhage in Mongolian gerbils
p. 127
