Rules and guidelines for gene nomenclature
Catalog of mutant genes and polymorphic loci
Retroviral and cancer-related genes
Linkage map
Map of the t-complex
Recombination percentages and chromosomal assignments
Linkage and synteny homologies in mouse and man
DNA polymorphisms
Highly repeated DNA families in the genome of Mus musculus
Rules for nomenclature of chromosome anomalies
Standard normal chromosomes
Chromosomal variants
Maps of chromosomal variants
Rules for nomenclature of inbred strains
Origins and characteristics of inbred strains of mice
The laboratory mouse and its wild relatives
Strain distribution of polymorphic variants
Recombinant inbred strains
Recombinant congenic strains - genetic composition
SSLP/Microsatellite genetic linkage map of the mouse
Principles and methods of transgenic mutagenesis
Subline codes for holders and producers
