Preface
Regio-and Chemo-Selective Polymerization of Phenols Catalyzed by Oxidoreductase Enzyme and Its Model Complexes
Tailored Mechanical Properties and Degradability of Polyesters by Controlled Molecular Architecture
NMR Investigation of Biodegradable Polyesters for Medical Applications
Synthesis and Characterization of Compatibilized Poly(beta,-caprolactone)/Granular Starch Composites
Cellulose Derivatives as Solid Electrolyte Matrixes
Polylactides; Properties and Prospects of an Environmentally Benign Plastic from Renewable Resources
Synthesis of Polylactides by New Aluminium Schoff's Base Complexes
Raman Characterization of Orientation in Poly(lactic acid) Films
Chain Transfer to Polymer in Emulsion of Copolymerizations
Stereocomplexes Based on Biodegradable Polymers and Bioactive Macromolecules
Interaction of Oligopeptides with Heparin
Designed Rubbery Biomaterials
Synthesis and Radical Polymerization of Hydrolytically Stable Dentin Bonding Agents
Spectroscopy of Conjugated Polymers: Phosphorescence and Delayed Fluorescence
Synthesis and Properties of Self Organizing Semiconducting and Luminescent Polymers and Model compounds
Preparation of Hole Transporting Polymers by Condensation Polymerization of Triphenylamine Derivatives
Luminescence Properties of Poly(p-phenylenevinylene) Derivatives Carrying Directly Attached Hole-Transporting Carbazole and Electron-Transporting Phenyloxadiazole Pendants
Approaches to Ultimate Functional Polymers: Quantum Functional and Molecular Engineering Materials
Polymers for Microlithographic Applications: New Directions and Challenges
Some unusual Structures in Thermotropic Mesophase Polymers
Formation of Interpenetrated Spherulities Based on Miscible Crystalline Polymer Blends
Crystal Structures and Order-Disorder Phenomena in Polymers
Polymer Crystallization in Complex Conditions. Towards More Realistic Modelling of Industrial Processes
Synthesis of Thermotropic Liquid Crystalline Polycarbosiloxanes and Manifestation of Nonclassical Conjunction in Polymer Backbone
Ferroelectric Liquid Crystalline Elastomers: From the Analysis of the Molecular Dynamics to the Design of Nanomachines
Microphase Separation in Solutions of Crystallizable Segmented Polyurethane
Phase Equilibria of PS with PMMA and Poly(co-methyl methacrylate and styrene)mers
Polyelectrolyte Behavior and Interpolyelectrolyte Matching of Astramol TM Poly(propylene imine) Dendrimers
Multiple Vesicular Morphologies from Block Copolymers in Solution
Hydrophilic Stimuli-Responsive Particles for Biomedical Applications
