

| | |
|--|---------|
| Preface | p. XI |
| List of Contributors | p. XIII |
| Asymmetric Transformations by Coupled Enzyme and Metal Catalysis: Dynamic Kinetic Resolution | p. 1 |
| Introduction | p. 1 |
| Some Fundamentals for DKR | p. 2 |
| Enzymes for Kinetic Resolution | p. 2 |
| Metal Catalysts for Racemization | p. 3 |
| Enzyme-Metal Combination for DKR | p. 5 |
| (R)- and (S)-Selective DKR | p. 5 |
| Examples of DKR | p. 6 |
| First DKR of Secondary Alcohols | p. 6 |
| DKR of Secondary Alcohols with Racemization Catalyst 1 | p. 6 |
| DKR of Secondary Alcohols with Racemization Catalyst 2 | p. 8 |
| DKR of Secondary Alcohols with Racemization Catalyst 3 | p. 9 |
| DKR of Secondary Alcohols with Racemization Catalyst 4 | p. 10 |
| DKR of Secondary Alcohols with Racemization Catalyst 5 | p. 10 |
| DKR of Secondary Alcohols with Racemization Catalyst 6 | p. 11 |
| DKR of Secondary Alcohols with Racemization Catalyst 7 | p. 12 |
| DKR of Secondary Alcohols with Air-Stable Racemization Catalysts | p. 13 |
| DKR of Secondary Alcohols with Racemization Catalyst 10 | p. 14 |
| DKR of Secondary Alcohols with Aluminum Catalysts | p. 14 |
| DKR of Secondary Alcohols with Vanadium Catalysts | p. 15 |
| Conclusions | p. 16 |
| References | p. 17 |
| Chemoenzymatic Routes to Enantiomerically Pure Amino Acids and Amines | p. 21 |
| Introduction | p. 21 |
| Amino Acids | p. 23 |
| Amines | p. 33 |
| References | p. 38 |
| Oxidizing Enzymes in Multi-Step Biotransformation Processes | p. 41 |
| Oxidizing Enzymes in Biocatalysis | p. 41 |
| Classes of Oxidizing Enzymes | p. 41 |
| Mechanisms of Biological Oxidation and Implications for Multi-Enzyme Biocatalysis | p. 44 |
| Multi-Step Biotransformation Processes Involving Oxidation | p. 45 |
| Design and Development of New Multi-Enzyme Oxidizing Processes | p. 48 |
| Coupling Redox Enzymes | p. 48 |
| Cofactor Recycle in Multi-Step Oxidizing Biocatalytic Systems | p. 51 |
| Examples of Multi-Enzyme Biotransformation Processes Involving Oxidizing Enzymes | p. 52 |
| Coupling of Oxidases with Non-Redox Enzymes | p. 53 |
| Biocatalytic Systems Involving Coupled Oxidizing Enzymes | p. 53 |

| | |
|--|--------|
| Multi-Enzyme Systems in Whole-Cell Biotransformations and Expression of Redox Systems in Recombinant Hosts | p. 55 |
| Other Applications of Multi-Enzyme Oxidizing Systems | p. 56 |
| Conclusions | p. 58 |
| References | p. 58 |
| Dihydroxyacetone Phosphate-Dependent Aldolases in the Core of Multi-Step Processes | p. 61 |
| Introduction | p. 61 |
| DHAP-Dependent Aldolases | p. 63 |
| Problem of DHAP Dependence | p. 63 |
| DHAP-Dependent Aldolases in the Core of Aza Sugar Synthesis | p. 68 |
| Combined Use of Aldolases and Isomerases for the Synthesis of Natural and Unnatural Sugars | p. 71 |
| DHAP-Dependent Aldolases in the Synthesis of Natural Products | p. 73 |
| Fructose-6-Phosphate Aldolase: An Alternative to DHAP-Dependent Aldolases? | p. 76 |
| Conclusions | p. 78 |
| References | p. 79 |
| Multi-Enzyme Systems for the Synthesis of Glycoconjugates | p. 83 |
| Introduction | p. 83 |
| In Vitro and In Vivo Multi-Enzymes Systems | p. 85 |
| Combinatorial Biocatalysis | p. 86 |
| Synthesis and In Situ Regeneration of Nucleotide Sugars | p. 88 |
| Synthesis of Oligosaccharides, Glycopeptides and Glycolipids Oligosaccharides | p. 94 |
| Combinatorial Biosynthesis | p. 97 |
| Synthesis of Oligosaccharides with Metabolically Engineered Cells | p. 98 |
| Conclusions | p. 102 |
| References | p. 102 |
| Enzyme-Catalyzed Cascade Reactions | p. 109 |
| Introduction | p. 109 |
| Enzyme Immobilization | p. 110 |
| Reaction Types: General Considerations | p. 111 |
| Chiral Alcohols | p. 112 |
| Chiral Amines | p. 114 |
| Chiral Carboxylic Acid Derivatives | p. 121 |
| C-C Bond Formation: Aldolases | p. 127 |
| Oxidations with O ₂ and H ₂ O ₂ | p. 130 |
| Conclusions and Prospects | p. 131 |
| References | p. 132 |
| Multi-modular Synthases as Tools of the Synthetic Chemist | p. 137 |
| Introduction | p. 137 |
| Excised Domains for Chemical Transformations | p. 139 |
| Function of Individual Domains and Domain Autonomy | p. 139 |

| | |
|--|--------|
| Heterocyclization and Aromatization | p. 139 |
| Macrocyclization | p. 144 |
| Halogenation | p. 147 |
| Glycosylation | p. 150 |
| Methyltransferases | p. 151 |
| Oxidation | p. 153 |
| Conclusions | p. 155 |
| References | p. 156 |
| Modifying the Glycosylation Pattern in Actinomycetes by Combinatorial Biosynthesis | p. 159 |
| Bioactive Natural Products in Actinomycetes | p. 159 |
| Deoxy Sugar Biosynthesis and Gene Clusters | p. 161 |
| Characterization of Sugar Biosynthesis Enzymes | p. 161 |
| Strategies for the Generation of Novel Glycosylated Derivatives | p. 165 |
| Gene Inactivation | p. 165 |
| Gene Expression | p. 166 |
| Combining Gene Inactivation and Gene Expression | p. 166 |
| Endowing a Host with the Capability of Synthesizing Different Sugars | p. 166 |
| Generation of Glycosylated Derivatives of Bioactive Compounds | p. 166 |
| Macrolides | p. 167 |
| Aureolic Acid Group | p. 175 |
| Angucyclines | p. 181 |
| Anthracyclines | p. 186 |
| Indolocarbazoles | p. 191 |
| Aminocoumarins | p. 193 |
| References | p. 194 |
| Microbial Production of DNA Building Blocks | p. 199 |
| Introduction | p. 199 |
| Screening of Acetaldehyde-Tolerant Deoxyriboaldolase and Its Application for DR5P Synthesis | p. 200 |
| Construction of Deoxyriboaldolase-Overexpressing <i>E. coli</i> and Metabolic Analysis of the <i>E. coli</i> Transformants for DR5P Production from Glucose and Acetaldehyde | p. 201 |
| Efficient Production of DR5P from Glucose and Acetaldehyde by Coupling of the Alcoholic Fermentation System of Baker's Yeast and Deoxyriboaldolase-Expressing <i>E. coli</i> | p. 203 |
| Biochemical Retrosynthesis of 2'-Deoxyribonucleosides from Glucose Acetaldehyde and a Nucleobase: Three-Step Multi-Enzyme-Catalyzed Synthesis | p. 204 |
| One-Pot Multi-Step Enzymatic Synthesis of 2'-Deoxyribonucleoside from Glucose, Acetaldehyde and a Nucleobase | p. 206 |
| Improvement of the One-Pot Multi-Step Enzymatic Process for Practical Production of 2'-Deoxyribonucleoside from Glucose, Acetaldehyde and a Nucleobase | p. 207 |
| Conclusions | p. 208 |
| References | p. 210 |

| | |
|--|--------|
| Combination of Biocatalysis and Chemical Catalysis for the Preparation of Pharmaceuticals Through Multi-Step Syntheses | p. 213 |
| Introduction: Biocatalysis and Chemical Catalysis | p. 213 |
| Pharmaceuticals with Hydrolases | p. 214 |
| Enzymatic Hydrolysis | p. 214 |
| Enzymatic Transesterification | p. 219 |
| Enzymatic Aminolysis | p. 222 |
| Pharmaceuticals with Oxidoreductases | p. 226 |
| Pharmaceuticals with Lyases | p. 227 |
| Conclusions | p. 230 |
| References | p. 231 |
| Index | p. 235 |
