

Preliminaries
Simplicial Complexes
Topological spaces
Homotopy equivalence and homotopy
Geometric simplicial complexes
Triangulations
Abstract simplicial complexes
Dimension of geometric realizations
Simplicial complexes and posets
The Borsuk-Ulam Theorem
The Borsuk-Ulam theorem in various guises
A geometric proof
A discrete version: Tucker's lemma
Another proof of Tucker's lemma
Direct Applications of Borsuk-Ulam
The ham sandwich theorem
On multicolored partitions and necklaces
Kneser's conjecture
More general Kneser graphs: Dolnikov's theorem
Gale's lemma and Schrijver's theorem
A Topological Interlude
Quotient spaces
Joins (and products)
k-connectedness
Recipes for showing k-connectedness
Cell complexes
 \mathbb{Z}_2 -Maps and Nonembeddability
Nonembeddability theorems: An introduction
 \mathbb{Z}_2 -spaces and \mathbb{Z}_2 -maps
The \mathbb{Z}_2 -index
Deleted products good ...
... deleted joins better
Bier spheres and the Van Kampen-Flores theorem
Sarkaria's inequality
Nonembeddability and Kneser colorings
A general lower bound for the chromatic number
Multiple Points of Coincidence
G-spaces
 E_nG spaces and the G-index
Deleted joins and deleted products
Necklace for many thieves

The topological Tverberg theorem

Many Tverberg partitions

Z_p -index, Kneser colorings, and p -fold points

The colored Tverberg theorem

A Quick Summary

Hints to Selected Exercises
