Protective Wrapper Development: A Case Study p. 1
Establishing Trust in COTS Components p. 15
Incorporation of Test Functionality into Software Components p. 25
Not All CBS Are Created Equally: COTS-Intensive Project Types p. 36
Defining a Quality Model for Mail Servers p. 51
Classifying Interoperability Conflicts p. 62
COTS Software Quality Evaluation p. 72
Modelling Component Dependencies to Inform Their Selection p. 81
The Space Shuttle and GPS: A Safety-Critical Navigation Upgrade p. 92
A Model for Recording Early-Stage Proposals and Decisions on Using COTS Component Architecture p. 101
Designing Secure Integration Architectures p. 112
Coordination in COTS-Based Development p. 123
Techniques for Embedding Executable Specifications in Software Component Interfaces p. 143
eCots Platform: An Inter-industrial Initiative for COTS-Related Information Sharing p. 157
COTS-Based Development: Taking the Pulse of a Project p. 168
Estimating the Cost of Security for COTS Software p. 178
Bringing COTS Information Technology into Small Manufacturing Enterprises p. 187
COTS Acquisition Evaluation Process: The Preacher's Practice p. 196
BiCom: An Evaluation Framework for COTS Components p. 207
Assessment of Reusable COTS Attributes p. 219
Implications of Using the Capability Maturity Model Integration (CMMI) for COTS-Based Systems p. 229
Evaluating COTS Based Architectures p. 240
UML-Based Integration Testing for Component-Based Software p. 251
Author Index p. 261
