An Intensional Theory of Function and Control Abstractions
Typechecking Dependent Types and Subtypes
Reducing Recursion to Iteration by Means of Pairs and N-tuples
Unification Revisited
Rule Rewriting Methods for Efficient Implementations of Horn logic
Submitted Contributions
PAP: A logic Programming System Based on a Constructive Logic
A Completeness Result for E-unification Algorithms Based on Conditional Narrowing

Representing Domain Structure of Many-sorted Prolog Knowledge Bases
Horn: An Inference Engine Prototype to Implement Intelligent Systems
Hints for the Design of a Set Calculus Oriented to Automated Deduction
