UNIX STREAMS Generation from a Formal Specification

Specifying and Realising Interactive Voice Services

Vertical Reuse in the Development of Distributed Systems with FDTs

Service-Oriented Systems Engineering: Modeling Services and Layered Architectures

Validation of the Sessionless Mode of the HTTPR Protocol

Generation of All Counter-Examples for Push-Down Systems

Modeling and Model Checking Mobile Phone Payment Systems

Behavioural Contracts for a Sound Assembly of Components

Automatic Verification of Annotated Code

Combating Infinite State Using Ergo

Numerical Coverage Estimation for the Symbolic Simulation of Real-Time Systems

Discrete Timed Automata and MONA: Description, Specification and Verification of a Multimedia Stream

Can Decision Diagrams Overcome State Space Explosion in Real-Time Verification?

How Stop and Wait Protocols Can Fail over the Internet

Introducing Commutative and Associative Operators in Cryptographic Protocol Analysis

A Lightweight Formal Analysis of a Multicast Key Management Scheme

Formal Security Policy Verification of Distributed Component-Structured Software

Towards Testing SDL Specifications: Models and Fault Coverage for Concurrent Timers

Concerning the Ordering of Adaptive Test Sequences

Correct Passive Testing Algorithms and Complete Fault Coverage

QoS Functional Testing for Multi-media Systems

Towards Testing Stochastic Timed Systems

Formal Design of Interactive Multimedia Documents

Progressive Solutions to a Parallel Automata Equation

Type Abstraction in Formal Protocol Specifications with Container Types

Decomposing Service Definition in Predicate/Transition-Nets for Designing Distributed Systems

Towards an Efficient Performance Evaluation of Communication Systems Described by Message Sequence Charts
