Scheduling

Scheduling-Aware Real-Time Garbage Collection Using Dual Aperiodic Servers p. 1
On the Composition of Real-Time Schedulers p. 18
An Approximation Algorithm for Broadcast Scheduling in Heterogeneous Clusters p. 38
Scheduling Jobs with Multiple Feasible Intervals p. 53
Deterministic and Statistical Deadline Guarantees for a Mixed Set of Periodic and Aperiodic Tasks p. 72
Real-Time Disk Scheduling with On-Disk Cache Conscious p. 88
Probabilistic Analysis of Multi-processor Scheduling of Tasks with Uncertain Parameters p. 103
Real-Time Virtual Machines for Avionics Software Porting and Development p. 123
Algorithms for Managing QoS for Real-Time Data Services Using Imprecise Computation p. 136

Networking and Communication

On Soft Real-Time Guarantees on Ethernet p. 158
BondingPlus: Real-Time Message Channel in Linux Ethernet Environment Using Regular Switching Hub p. 176
An Efficient Switch Design for Scheduling Real-Time Multicast Traffic p. 194

Embedded Systems/Environments

XRTJ: An Extensible Distributed High-Integrity Real-Time Java Environment p. 208
Quasi-Dynamic Scheduling for the Synthesis of Real-Time Embedded Software with Local and Global Deadlines p. 229
Framework-Based Development of Embedded Real-Time Systems Hui-Ming Su and Jing Chen p. 244

OVL Assertion-Checking of Embedded Software with Dense-Time Semantics p. 254

Pervasive/Ubiquitous Computing

System Support for Distributed Augmented Reality in Ubiquitous Computing Environments p. 279
Zero-Stop Authentication: Sensor-Based Real-Time Authentication System p. 296
An Interface-Based Naming System for Ubiquitous Internet Applications p. 312

Systems and Architectures

Schedulability Analysis in EDF Scheduler with Cache Memories p. 328
Impact of Operating System on Real-Time Main-Memory Database System's Performance p. 342

The Design of a QoS-Aware MPEG-4 Video System p. 351

Resource Management

Constrained Energy Allocation for Mixed Hard and Soft Real-Time Tasks p. 371
An Energy-Efficient Route Maintenance Scheme for Ad Hoc Networking Systems p. 389
Resource Reservation and Enforcement for Framebuffer-Based Devices p. 398

File Systems and Databases

An Efficient B-Tree Layer for Flash-Memory Storage Systems p. 409
Multi-disk Scheduling for High-Performance RAID-0 Devices p. 431
Database Pointers: A Predictable Way of Manipulating Hot Data in Hard Real-Time Systems p. 454
Performance Analysis
Extracting Temporal Properties from Real-Time Systems by Automatic Tracing Analysis  p. 466

Rigorous Modeling of Disk Performance for Real-Time Applications p. 486
Bounding the Execution Times of DMA I/O Tasks on Hard-Real-Time Embedded Systems p. 499

Tools and Development
Introducing Temporal Analyzability Late in the Lifecycle of Complex Real-Time Systems p. 513
RESS: Real-Time Embedded Software Synthesis and Prototyping Methodology p. 529
Software Platform for Embedded Software Development p. 545
Towards Aspectual Component-Based Development of Real-Time Systems p. 558
Testing of Multi-Tasking Real-Time Systems with Critical Sections p. 578
Symbolic Simulation of Real-Time Concurrent Systems p. 595

Author Index p. 619
