Business process management demystified: a tutorial on models, systems and standards p. 1
for workflow management

InterPlay: horizontal scale-up and transition to design in scenario-based programming p. 66

Timed automata: semantics, algorithms and tools p. 87

Petri nets and dependability p. 125

A coloured Petri net approach to protocol verification p. 210

Extending the zero-safe approach to coloured, reconfigurable and dynamic nets p. 291

A survey on non-interference with Petri nets p. 328

Synthesis of asynchronous hardware from Petri nets p. 345

Teaching coloured Petri nets: examples of courses and lessons learned p. 402

Unbounded Petri net synthesis p. 413

Petri nets and software engineering p. 439

Model validation in controller design p. 467

Graph grammars and Petri net transformations p. 496

Message sequence charts p. 537

Model-based development of executable business processes for Web services p. 559

Modelling and control with modules of signal nets p. 585

Application of coloured Petri nets in system development p. 626

Bigraphs for Petri nets p. 686

Notes on timed concurrent constraint programming p. 702

Petri nets and manufacturing systems: an examples-driven tour p. 742

Communicating transaction processes: an MSC-based model of computation for reactive embedded systems p. 789

Object Petri nets p. 819
