Volume I

A-Life, Adaptive Behavior, Agents, and Ant Colony Optimization

Efficient Evaluation Functions for Multi-rover Systems p. 1
A Particle Swarm Model of Organizational Adaptation p. 12
Finding Maximum Cliques with Distributed Ants p. 24
Ant System for the k-Cardinality Tree Problem p. 36
A Hybrid Ant Colony Optimisation Technique for Dynamic Vehicle Routing p. 48
Cooperative Problem Solving Using an Agent-Based Market p. 60
Cultural Evolution for Sequential Decision Tasks: Evolving Tic-Tac-Toe Players in Multi-agent Systems p. 72
Artificial Life and Natural Intelligence p. 81
Bluenome: A Novel Developmental Model of Artificial Morphogenesis p. 93
Adaptively Choosing Neighbourhood Bests Using Species in a Particle Swarm Optimizer for Multimodal Function Optimization p. 105
Better Spread and Convergence: Particle Swarm Multiobjective Optimization Using the Maximin Fitness Function p. 117
Evolving a Self-Repairing, Self-Regulating, French Flag Organism p. 129
The Kalman Swarm (A New Approach to Particle Motion in Swarm Optimization) p. 140
Adaptive and Evolvable Network Services p. 151
Grammatical Swarm p. 163
A New Universal Cellular Automaton Discovered by Evolutionary Algorithms p. 175
An Interactive Artificial Ant Approach to Non-photorealistic Rendering p. 188
Automatic Creation of Team-Control Plans Using an Assignment Branch in Genetic Programming p. 201
Implications of Epigenetic Learning Via Modification of Histones on Performance of Genetic Programming p. 213
Using Clustering Techniques to Improve the Performance of a Multi-objective Particle Swarm Optimizer p. 225
SWAF: Swarm Algorithm Framework for Numerical Optimization p. 238
A-Life, Adaptive Behavior, Agents, and Ant Colony Optimization - Posters
Autonomous Agent for Multi-objective Optimization p. 251
An Evolved Autonomous Controller for Satellite Task Scheduling p. 253
Multi-agent Foreign Exchange Market Modelling Via GP p. 255
An Evolutionary Autonomous Agent with Visual Cortex and Recurrent Spiking Columnar Neural Network p. 257
Arguments for ACO's Success p. 259
Solving Engineering Design Problems by Social Cognitive Optimization p. 261
Artificial Immune Systems
Vulnerability Analysis of Immunity-Based Intrusion Detection Systems Using Evolutionary Hackers p. 263
Constructing Detectors in Schema Complementary Space for Anomaly Detection p. 275
Real-Valued Negative Selection Algorithm with Variable-Sized Detectors p. 287
An Investigation of R-Chunk Detector Generation on Higher Alphabets p. 299
A Comment on Opt-AiNET: An Immune Network Algorithm for Optimisation p. 308
Artificial Immune Systems - Posters
A Novel Immune Feedback Control Algorithm and Its Applications p. 318

Biological Applications
Automating Genetic Network Inference with Minimal Physical Experimentation Using Coevolution p. 333
A Genetic Approach for Gene Selection on Microarray Expression Data p. 346
Fuzzy Dominance Based Multi-objective GA-Simplex Hybrid Algorithms Applied to Gene Network Models p. 356
Selection-Insertion Schemes in Genetic Algorithms for the Flexible Ligand Docking Problem p. 368
A GA Approach to the Definition of Regulatory Signals in Genomic Sequences p. 380
Systems Biology Modeling in Human Genetics Using Petri Nets and Grammatical Evolution p. 392

Evolutionary Computation Techniques for Optimizing Fuzzy Cognitive Maps in Radiation Therapy Systems p. 402
Identification of Informative Genes for Molecular Classification Using Probabilistic Model Building Genetic Algorithm p. 414
GA-Facilitated Knowledge Discovery and Pattern Recognition Optimization Applied to the Biochemistry of Protein Solvation p. 426
Genetic Programming Neural Networks as a Bioinformatics Tool for Human Genetics p. 438
Evolving Better Multiple Sequence Alignments p. 449
Optimizing Topology and Parameters of Gene Regulatory Network Models from Time-Series Experiments p. 461
Comparing Genetic Programming and Evolution Strategies on Inferring Gene Regulatory Networks p. 471
An Evolutionary Approach with Pharmacophore-Based Scoring Functions for Virtual Database Screening p. 481

Biological Applications - Posters
Statistical Test-Based Evolutionary Segmentation of Yeast Genome p. 493
Equilibrium and Extinction in a Trisexual Diploid Mating System: An Investigation p. 495

On Parameterizing Models of Antigen-Antibody Binding Dynamics on Surfaces - A Genetic Algorithm Approach and the Need for Speed p. 497
Is the Predicted ESS in the Sequential Assessment Game Evolvable? p. 499

Coevolution
Automated Extraction of Problem Structure p. 501
Modeling Coevolutionary Genetic Algorithms on Two-Bit Landscapes: Random Partnering p. 513
The Incremental Pareto-Coevolution Archive p. 525
A Cooperative Coevolutionary Multiobjective Algorithm Using Non-dominated Sorting p. 537
Predicting Genetic Drift in 2 × 2 Games p. 549
Similarities Between Co-evolution and Learning Classifier Systems and Their Applications p. 561
A Sensitivity Analysis of a Cooperative Coevolutionary Algorithm Biased for Optimization p. 573
Coevolution - Posters

A Population-Differential Method of Monitoring Success and Failure in Coevolution  
Cooperative Coevolution Fusion for Moving Object Detection  
Evolutionary Robotics

Learning to Acquire Autonomous Behavior - Cooperation by Humanoid Robots -  
Evolved Motor Primitives and Sequences in a Hierarchical Recurrent Neural Network

Robot Trajectory Planning Using Multi-objective Genetic Algorithm Optimization  
Evolution, Robustness, and Adaptation of Sidewinding Locomotion of Simulated Snake-Like Robot  
Evolutionary Robotics - Poster

Evolution Tunes Coevolution: Modelling Robot Cognition Mechanisms  
Evolution Strategies/Evolutionary Programming

On the Complexity to Approach Optimum Solutions by Inhomogeneous Markov Chains  
Actuator Noise in Recombinant Evolution Strategies on General Quadratic Fitness Models

Convergence Examples of a Filter-Based Evolutionary Algorithm  
Node-Depth Encoding for Evolutionary Algorithms Applied to Network Design  
Reducing Fitness Evaluations Using Clustering Techniques and Neural Network Ensembles

An Improved Diversity Mechanism for Solving Constrained Optimization Problems Using a Multimembered Evolution Strategy  
Randomized Local Search, Evolutionary Algorithms, and the Minimum Spanning Tree Problem  
An Evolution Strategy Using a Continuous Version of the Gray-Code Neighbourhood Distribution

A Novel Multi-objective Orthogonal Simulated Annealing Algorithm for Solving Multi-objective Optimization Problems with a Large Number of Parameters  
On the Choice of the Population Size

An Analysis of the (¼+1) EA on Simple Pseudo-Boolean Functions  
Program Evolution by Integrating EDP and GP  
Evolution Strategies/Evolutionary Programming - Posters

A Step Size Preserving Directed Mutation Operator  
A Comparison of Several Algorithms and Representations for Single Objective Optimization

Towards a Generally Applicable Self-Adapting Hybridization of Evolutionary Algorithms  
Evolvable Hardware

High Temperature Experiments for Circuit Self-Recovery  
The Emergence of Ontogenic Scaffolding in a Stochastic Development Environment  
A Reconfigurable Chip for Evolvable Hardware

Genetic Algorithms

Experimental Evaluation of Discretization Schemes for Rule Induction
Real-Coded Bayesian Optimization Algorithm: Bringing the Strength of BOA into the Continuous World

Training Neural Networks with GA Hybrid Algorithms

Growth Curves and Takeover Time in Distributed Evolutionary Algorithms

Simultaneity Matrix for Solving Hierarchically Decomposable Functions

Metaheuristics for Natural Language Tagging

An Effective Real-Parameter Genetic Algorithm with Parent Centric Normal Crossover for Multimodal Optimisation

Looking Under the EA Hood with Price's Equation

Distribution of Evolutionary Algorithms in Heterogeneous Networks

A Statistical Model of GA Dynamics for the OneMax Problem

Adaptive Sampling for Noisy Problems

Feature Subset Selection, Class Separability, and Genetic Algorithms

Introducing Subchromosome Representations to the Linkage Learning Genetic Algorithm

Interactive One-Max Problem Allows to Compare the Performance of Interactive and Human-Based Genetic Algorithms

Polynomial Approximation of Survival Probabilities Under Multi-point Crossover

Evolving Genotype to Phenotype Mappings with a Multiple-Chromosome Genetic Algorithm

What Basis for Genetic Dynamics?

Exploiting Modularity, Hierarchy, and Repetition in Variable-Length Problems

Optimal Operating Conditions for Overhead Crane Maneuvering Using Multi-objective Evolutionary Algorithms

Efficiently Solving: A Large-Scale Integer Linear Program Using a Customized Genetic Algorithm

Using a Genetic Algorithm to Design and Improve Storage Area Network Architectures

Distributed Constraint Satisfaction, Restricted Recombination, and Hybrid Genetic Search

Analysis of the (1 + 1) EA for a Noisy OneMax

A Polynomial Upper Bound for a Mutation-Based Algorithm on the Two-Dimensional Ising Model

The Ising Model on the Ring: Mutation Versus Recombination

Effects of Module Encapsulation in Repetitively Modular Genotypes on the Search Space

Modeling Selection Intensity for Toroidal Cellular Evolutionary Algorithms

Evolution of Fuzzy Rule Based Classifiers

Self Adaptation of Operator Rates in Evolutionary Algorithms

PolyEDA: Combining Estimation of Distribution Algorithms and Linear Inequality Constraints

Improving the Locality Properties of Binary Representations

Schema Disruption in Chromosomes That Are Structured as Binary Trees

The Royal Road Not Taken: A Re-examination of the Reasons for GA Failure on R1

Robust and Efficient Genetic Algorithms with Hierarchical Niching and a Sustainable Evolutionary Computation Model
