Ludic engagement and immersion as a generic paradigm for human-computer interaction (p. 3)

Realization of tai-chi motion using a humanoid robot (p. 14)

Building better systems for learning and training: bringing the entertainment industry and simulation technology together (p. 20)

Game intelligence: from animal play behavior to entertainment computing (p. 21)

Effects of violent video games on aggressive behavior, helping behavior, aggressive thoughts, angry feelings, and physiological arousal (p. 22)

New behavioural approaches for virtual environments (p. 23)

"Kuru-kuru pitcher": a game for the superscript S subscript c chair Internet chair (p. 35)

Fun and sports: enhancing the home fitness experience (p. 46)

Manipulating multimedia contents with tangible media control system (p. 57)

"Tangible influence": towards a new interaction paradigm for computer games (p. 68)

Computer supported collaborative sports: creating social spaces filled with sports activities (p. 80)

Optical-flow-driven gadgets for gaming user interface (p. 90)

The human-information workspace (HI-space): ambient table top entertainment (p. 101)

Game-driven intelligent tutoring systems (p. 108)

Practice!: YUBIMOJI AIUEO for Japanese hand language learning (p. 114)

The bush telegraph: networked cooperative music-making (p. 120)

Live role-playing games: implications for pervasive gaming (p. 127)

Animating conversation in online games (p. 139)

From artistry to automation: a structured methodology for procedural content creation (p. 151)

Commedia Virtuale: theatre inspiration for expressive avatars (p. 157)

Take the money and run?: an ethical approach to the relation between game research and game industry (p. 163)

Moved by movements: how character movements cue us to form specific genre and affective impressions (p. 168)

Improvisation in theatre rehearsals for synthetic actors (p. 172)

Enjoyment and entertainment in east and west (p. 176)

Interactive props and choreography planning with the mixed reality stage (p. 185)

The interactive and multi-protagonist film: a hypermovie on DVD (p. 193)

Apply social network analysis and data mining to dynamic task synthesis for persistent MMORPG virtual world (p. 204)

How realistic is realism?: considerations on the aesthetics of computer games (p. 216)

Read-it: a multi-modal tangible interface for children who learn to read (p. 226)

Exploiting films and multiple subtitles interaction for casual foreign language learning in the living room (p. 235)

CLOVES: a virtual world builder for constructing virtual environments for science inquiry learning (p. 241)

SEITV - interactive multimedia leisure/educational services for digital TV in MHP (p. 248)

Tangible augmented reality modeling (p. 254)
Human body tracking for human computer intelligent interaction p. 260
A graphical system for interactive rendering of objects in an augmented reality scenery p. 266
TEAM : the team-oriented evolutionary adaptability mechanism p. 273
Size variation and flow experience of physical game support objects p. 283
Enhancing the performance of dynamic scripting in computer games p. 296
Open-source game development with the multi-user publishing environment (MUPE) application platform p. 308
Player-centered game environments : assessing player opinions, experiences, and issues p. 321
An application of game-refinement theory to mah jong p. 333
The design and implementation of multi-player card games on multi-user interactive tabletop surfaces p. 339
Entertainment feature of a computer game using a biological signal to realize a battle with oneself p. 345
AI : the missing link in digital game interface design? p. 351
Engaging game characters : informing design with player perspectives p. 355
Emergent stories in massively multiplayer online games : using improvisational techniques to design for emotional impact p. 359
Towards a framework for design guidelines for young children's computer games p. 365
Social translucence of the Xbox live voice channel p. 377
Artifact-based human-computer interface for the handicapped p. 386
A home page is where the heart is : using games based design techniques to enhance contact centre interfaces p. 393
Avoiding average : recording interaction data to design for specific user groups p. 398
Physiological response to games and non-games : a contrastive study p. 402
Probabilistic opponent-model search in Bao p. 409
Agent wars with artificial immune systems p. 420
MMOG player classification using hidden Markov models p. 429
Expanding spheres : a collision detection algorithm for interest management in networked games p. 435
Electronic augmentation of traditional board games p. 441
Strategy selection in games using co-evolution between artificial immune systems p. 445
Level of detail modelling in a computer game engine p. 451
Networked mobile gaming for 3G-networks p. 457
Mobile games for training tactile perception p. 468
Emotionally loaded mobile multimedia messaging p. 476
"Why is everyone inside me?!!" : using shared displays in mobile computer games p. 487
Associated emotion and its expression in an entertainment robot QRIO p. 499
Position-aware IEEE 802.11b mobile video services p. 505
A human-pet interactive entertainment system over the Internet p. 509
Developing and evaluating mobile entertainment applications : the case of the music industry p. 513
An entertaining way to access Web content p. 518
Design of an interface for technology supported collaborative learning - the RAFT approach  p. 522

iFP : a music interface using an expressive performance template  p. 529

Sound pryer : adding value to traffic encounters with streaming audio  p. 541

Harmonics table : audiovisual expression of group interaction on a sensing table  p. 553

Hello-fish : interacting with pet fishes through animated digital wallpaper on a screen  p. 559

Background music generation using music texture synthesis  p. 565

A progressive sounding object model in virtual environment  p. 571

Automatic visual data management system  p. 579

Development of extemporaneous performance by synthetic actors in the rehearsal process  p. 586

An efficient CLOD method for large-scale terrain visualization  p. 592

Integrating ideas about invisible playgrounds from play theory into online educational digital games  p. 598

EffecTV : a real-time software video effect processor for entertainment  p. 602

Web-based tool for analyzing emotions through images and generating a music therapy system  p. 606

Turning photo annotating tasks into instant messaging fun : prototyping, user trials, and roadmapping  p. 610
