Exact optimization of discrete constrained total variation minimization problems  p. 548
Tensor algebra : a combinatorial approach to the projective geometry of figures  p. 558
Junction and corner detection through the extraction and analysis of line segments  p. 568

Geometric algebra for pose estimation and surface morphing in human motion estimation p. 583

A study on supervised classification of remote sensing satellite image by Bayesian algorithm using average fuzzy intracluster distance  p. 597
Tree species recognition with fuzzy texture parameters  p. 607
Fast segmentation of high-resolution satellite images using watershed transform combined with an efficient region merging approach  p. 621
Joint non-rigid motion estimation and segmentation  p. 631
Sequential probabilistic grass field segmentation of soccer video images  p. 639
Adaptive local binarization method for recognition of vehicle license plates  p. 646
Blur identification and image restoration based on evolutionary multiple object segmentation for digital auto-focusing  p. 656
Performance evaluation of binarizations of scanned insect footprints  p. 669
2D shape recognition using discrete wavelet descriptor under similitude transform  p. 679

Which stereo matching algorithm for accurate 3D face creation?  p. 690
Video cataloging system for real-time scene change detection of news video  p. 705
Automatic face recognition by support vector machines  p. 716
Practical region-based matching for stereo vision  p. 726
Video program clustering indexing based on face recognition hybrid model of hidden Markov model and support vector machine  p. 739
Texture feature extraction and selection for classification of images in a sequence  p. 750
