Databases and the semantic Web: data semantics revisited

DSL weaving for distributed information flow systems

Broadening vector space schemes for improving the quality of information retrieval

A neural network approach to Web graph processing

Languages for the Net: from presentation to collaboration

Some issues for fundamental research on information sciences in China

An incremental subspace learning algorithm to categorize large scale text data

Classifying criminal charges in Chinese for Web-based legal services

A unified probabilistic framework for clustering correlated heterogeneous Web objects

CLINCH: clustering incomplete high-dimensional data for data mining application

Topic discovery from documents using ant-based clustering combination

A pattern-based voting approach for concept discovery on the Web

A similarity reinforcement algorithm for heterogeneous Web pages

Constraint-based graph mining in large database

Estimating the number of substring matches in long string databases

An efficient topic-specific Web text filtering framework

An extension of UML activity diagram for generation of XPDL document

Block-based language modeling approach towards Web search

Level-based link analysis

A formal approach to evaluate and compare Internet search engines: a case study on searching the Chinese Web

IglooG: a distributed Web crawler based on grid service

An updates dissemination protocol for read-only transaction processing in mobile real-time computing environments

Scalable and fault tolerant multiple tuple space architecture for mobile agent communication

LinkNet: a new approach for searching in a large peer-to-peer system

P2P-based Web text information retrieval

LMIX: a dynamic XML index method using line model

A new sequential mining approach to XML document clustering

Labeling scheme and structural joins for graph-structured XML data

Constructing extensible XQuery mappings for XML data sharing

Towards secure XML document with usage control

A comparative study of functional dependencies for XML

Checking multivalued dependencies in XML

Making DTD a truly powerful schema language

An algebra for capability object interoperability of heterogeneous data integration systems

DartGrid: RDF-mediated database integration and process coordination using grid as the platform

Collaborative Web application for flood control system of reservoirs

IWWS: a reliability-based WWW collaborative recommender system
Anycast-based cooperative proxy caching p. 771
Semantic caching for Web-based spatial applications p. 783
Neural network hot spot prediction algorithm for shared Web caching system p. 795
A common application-centric QoS model for selecting optimal grid services p. 807
Temporal dependency for dynamic verification of fixed-date constraints in grid workflow systems p. 820
A new method for online scheduling in computational grid environments p. 832
Influence of performance prediction inaccuracy on task scheduling in grid environment p. 838
Grid accounting information gathering system with access control p. 845
Neural network modeling of transmission rate control factor for multimedia transmission using the Internet p. 851
A peer to peer proxy patching scheme for VOD Servers p. 863
An indexing method for two-D pattern matching with applications to digital image searches p. 875
Indexing text and visual features for WWW images p. 885
Chinese named entity recognition with a hybrid-statistical model p. 900
Towards a formal framework for distributed identity management p. 913
Address extraction: extraction of location-based information from the Web p. 925
PlusDBG: Web community extraction scheme improving both precision and pseudo-recall p. 938
Fuzzy inference system with probability factor and its application in data mining p. 944
Interactive semantic-based visualization environment for traditional Chinese medicine information p. 950
Components for building desktop-application-like interface in Web applications p. 960
Supervised semi-definite embedding for email data cleaning and visualization p. 972
Visual mining for customer targeting p. 983
On designing a novel PI controller for AQM routers supporting TCP flows p. 991
Call admission control with multiple priorities Erlang B system p. 1003
ACDN: active content distribution network p. 1015
A real-time multimedia data transmission rate control using a neural network prediction algorithm p. 1021
Stratus: a distributed Web service discovery infrastructure based on double-overlay network p. 1027
ShanghaiGrid: a grid prototype for metropolis information services p. 1033
Sentential association based text classification systems p. 1037
Q-GSM: QoS oriented grid service management p. 1041
Skyhawk grid system p. 1045
Cooperative ontology development environment CODE and a demo semantic Web on economics p. 1049
Dart database grid: a dynamic, adaptive, RDF-mediated, transparent approach to database integration for semantic Web p. 1053
Voice user interface design for a telephone application using VoiceXML p. 1058
Content browsing by walking in real and cyber spaces p. 1062
A personal Web bulletin board with autonomic behaviors and virtual portal function  p. 1066

ImageAspect finder/difference-amplifier: focusing on peripheral information for image search and browsing  p. 1070

Tools for media conversion and fusion of TV and Web contents  p. 1075
