Risk assessment of production networks using honeynets - some practical experience   p. 1

POSSET - policy-driven secure session transfer   p. 13

Modeling and evaluation of security architecture for wireless local area networks by indexing method : a novel approach   p. 25

Robust routing in malicious environment for ad hoc networks   p. 36

Short linkable ring signatures for E-voting, E-cash and attestation   p. 48

Tracing traitors by guessing secrets : the q-Ary case   p. 61

Probabilistic analyses on finding optimal combinations of primality tests in real applications   p. 74

Countermeasures for preventing comb method against SCA attacks   p. 85

An Email worm vaccine architecture   p. 97

Enforcing the principle of least privilege with a state-based privilege control model   p. 109

Security on-demand architecture with multiple modules support   p. 121

Measuring resistance to social engineering   p. 132

Conformance checking of RBAC policy and its implementation   p. 144

A practical aspect framework for enforcing fine-grained access control in Web applications   p. 156

A task-oriented access control model for WfMS   p. 168

A brief observation-centric analysis on anomaly-based intrusion detection   p. 178

Detection of distributed denial of service attacks using statistical pre-processor and unsupervised neural networks   p. 192

Visual spoofing of SSL protected Web sites and effective countermeasures   p. 204

Model redundancy vs. intrusion detection   p. 217

An open approach for designing secure electronic immobilizers   p. 230

An empirical study on the usability of logout in a single sign-on system   p. 243

Secure software delivery and installation in embedded systems   p. 255

A restricted multi-show credential system and its application on E-voting   p. 268

Recard : using recommendation cards approach for building trust in peer-to-peer networks   p. 280

Using trust for restricted delegation in grid environments   p. 293

Computer vulnerability evaluation using fault tree analysis   p. 302

An identity-based grid security infrastructure model   p. 314

Towards multilateral-secure DRM platforms   p. 326

Hiding data in binary images   p. 338

Performance analysis of CDMA-based watermarking with quantization scheme   p. 350

Protecting mass data basing on small trusted agent   p. 362

On the security of some nonrepudiable threshold proxy signature schemes   p. 374

Token-controlled public key encryption   p. 386

A new class of codes for fingerprinting schemes   p. 398

t-Out-of-n string/bit oblivious transfers revisited   p. 410
