Foundations
Formal Concept Analysis as Mathematical Theory of Concepts and Concept Hierarchies  p. 1

Semiconcept and Protoconcept Algebras: The Basic Theorems  p. 34
Features of Interaction Between Formal Concept Analysis and Algebraic Geometry  p. 49
From Formal Concept Analysis to Contextual Logic  p. 81
Contextual Attribute Logic of Many-Valued Attributes  p. 101
Treating Incomplete Knowledge in Formal Concept Analysis  p. 114
States, Transitions, and Life Tracks in Temporal Concept Analysis  p. 127

Applications
Linguistic Applications of Formal Concept Analysis  p. 149
Using Concept Lattices for Text Retrieval and Mining  p. 161
Efficient Mining of Association Rules Basedon Formal Concept Analysis  p. 180
Galois Connections in Data Analysis: Contributions from the Soviet Era and Modern Russian Research  p. 196
Conceptual Knowledge Processing in the Field of Economics  p. 226
Software Engineering
A Survey of Formal Concept Analysis Support for Software Engineering Activities  p. 250
Concept Lattices in Software Analysis  p. 272
Formal Concept Analysis Used for Software Analysis and Modelling  p. 288
Formal Concept Analysis-Based Class Hierarchy Design in Object-Oriented Software Development  p. 304
The ToscanaJ Suite for Implementing Conceptual Information Systems  p. 324

Author Index  p. 349
