Modeling and analysis of mobile service processes by example of the housing industry p. 1

An organisational perspective on collaborative business processes p. 17
Mining hierarchies of models : from abstract views to concrete specifications p. 32
Flexible business process management using forward stepping and alternative paths p. 48

Semi-automatic generation of Web services and BPEL processes - a model-driven approach p. 64
A human-oriented tuning of workflow management systems p. 80
The price of coordination in resource management p. 96
sPAC (Web services performance analysis center) : performance analysis and estimation tool of Web services p. 109
Specifying Web workflow services for finding partners in the context of loose inter-organizational workflow p. 120

An intuitive formal approach to dynamic workflow modeling and analysis p. 137
Using the [pi]-calculus for formalizing workflow patterns p. 153
Mining workflow recovery from event based logs p. 169
Behavior based integration of composite business processes p. 186
Visualization support for managing large business process specifications p. 205
Transforming BPEL to petri nets p. 220
Event-based coordination of process-oriented composite applications p. 236
Integrating process learning and process evolution - a semantics based approach p. 252
An analysis and taxonomy of unstructured workflows p. 268
A framework for document-driven workflow systems p. 285
Service interaction patterns p. 302
Modeling and assessment of production printing workflows using petri nets p. 319
Process management in health care : a system for preventing risks and medical errors p. 334

A pathway for process improvement activities in a production environment : a case study in a rework department p. 344
IT support for healthcare processes p. 354
From RosettaNet PIPs to BPEL processes : a three level approach for business protocols p. 364

Using software quality characteristics to measure business process quality p. 374
Business process modelling and improvement using TAD methodology p. 380
On the suitability of correctness criteria for business process models p. 386
Service retrieval based on behavioral specifications and quality requirements p. 392
On the semantics of EPCs : efficient calculation and simulation p. 398
Towards integrating business policies with business processes p. 404
A contract layered architecture for regulating cross-organisational business processes p. 410
An effective content management methodology for business process management p. 416
Specification and management of policies in service oriented business collaboration p. 422

Yet another event-driven process chain p. 428
Comparing the control-flow of EPC and petri net from the end-user perspective p. 434
Overview of transactional patterns: combining workflow flexibility and transactional reliability for composite Web services p. 440
Accelerated enterprise process modeling through a formalized functional typology p. 446
Introducing business process into legacy information systems p. 452
Spheres of isolation: adaptation of isolation levels to transactional workflow p. 458
Verification of SAP reference models p. 464
