

Artificial Stock Markets

Time Series Properties from an Artificial Stock Market with a Walrasian Auctioneer	p. 3
Market Dynamics and Agents Behaviors: a Computational Approach	p. 15
Traders Imprint Themselves by Adaptively Updating their Own Avatar	p. 27
Learning in Models	
Learning in Continuous Double Auction Market	p. 41
Firms Adaptation in Dynamic Economic Systems	p. 53
Firm Size Dynamics in a Cournot Computational Model	p. 65
Case-Studies and Applications	
Emergence of a Self-Organized Dynamic Fishery Sector: Application to Simulation of the Small-Scale Fresh Fish Supply Chain in Senegal	p. 79
Multi-Agent Model of Trust in a Human Game	p. 91
A Counterexample for the Bullwhip Effect in a Supply Chain	p. 103
Bottom-Up Approaches	
Collective Efficiency in Two-Sided Matching	p. 115
Complex Dynamics, Financial Fragility and Stylized Facts	p. 127
Noisy Trading in the Large Market Limit	p. 137
Emergence in Multi-Agent Systems: Cognitive Hierarchy, Detection, and Complexity Reduction part I: Methodological Issues	p. 147
Methodological Issues	
The Implications of Case-Based Reasoning in Strategic Contexts	p. 163
A Model of Myerson-Nash Equilibria in Networks	p. 175
Market Dynamics	
Stock Price Dynamics in Artificial Multi-Agent Stock Markets	p. 191
Market Failure Caused by Quality Uncertainty	p. 203
Learning and the Price Dynamics of a Double-Auction Financial Market with Portfolio Traders	p. 215
How Do the Differences Among Order Distributions Affect the Rate of Investment Returns and the Contract Rate	p. 227
